USGS name _____
Local name Slide Creek T71S, R82E, S5

Species	Date(s) Observed	Spawning	Rearing	Migration
ST	6-13-89	X	X	X
(Resident above falls) DV	6-13-89	X	X	X

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.
Stream has been very heavily impacted by a very large natural massive soil failure within about last 6 months (Nov. '88?). Heavy sediments in stream may have killed off this years spawn. Barrier falls is found about ½ way between large lake and slide. (about 1 mile upstream from lake). Steelhead was 1yr + (maybe 2+).

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
