REGION II
HABITAT DIVISION

Species	Date(s) Observed	Spawning	Rearing	Migration
CHUM SALMON	July 29, 1986			✓

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

I observed 5 adult chum salmon in the lower one mile of Bettles River on July 29, 1986. I could not determine if the fish were spawning in the immediate vicinity. I saw no redds on that date in the lower Bettles River.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
