Species	Date(s) Observed	Spawning	Rearing	Migration IN/OUT
KING SALMON	9/13/84	X		
CHUM SALMON	9/11-15/84	X		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

KINGS WERE TWO (2) FEMALE CARCASS FOUND WASHED ONTO SANDBARS. ONE WAS FOUND APPROXIMATELY 1/2 MILE UP FROM MOUTH; OTHER WAS ON GRAVEL BAR FORMED BY SELBY AT MOUTH. BOTH FISH HAD ZERO (Ø) EGG RETENTION INDICATING SUCCESSFUL SPAWNING. CHUMS HAVE BEED DOCUMENTED IN SELBY SLOUGH FOR MANY YEARS... ABOUT TIME TO INCLUDE THIS IN THE CATALOG.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
