Add Sk on 331-00-10060-2120

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Sockeye and Pinks seen among spawning chums. Captured one (1) male spawned out sockeye. Sent scales to Anchorage Archives. Sockeye captured on sport tackle on Wulik River approximately 5 miles downstream from Ikalukrak, unable to determine spawning/rearing/migration status, at least migration.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
