For Office Use

Nomination # 93-851	Regional Supervisor: Ed Weiss — Date: 8/26/02
Revision Year: 1994	
Revision to: Atlas ____ Catalog ____ Both ____	
Revision Code: F2	Drafted — Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

DELETE PER ATTACHED REQUEST FROM KEN ROBERSON.

SUBJECT: Anadromous Catalog Deletions

212-20-0080-2310

I noticed in a recent permit that the Kotsina River is listed for sockeye spawning. I am not aware of any documentation or observation to back this one up. Could you ascertain the who, what and when on this? Otherwise, I have to recommend that it be removed from the Catalog.

In addition, the Tiekel River has been listed since before I came to Glennallen (more than 20 years ago) and I am not aware of any documented observation of salmon spawning in the Tiekel River. There is spawning in and below what we refer to as Tiekel Lake which is located immediately downstream from the mouth of the Tiekel River but is a seperate location. Again, I have to recommend that unless there is a current valid documentation, that it be removed from the catalog. I realize that this location is sensitive to the Copper River Highway issue; however, credibility is extremely important just as protection of the resource is.

212-20-0080

As time allows, I will check further on the maps for our area and try to determine if more "ghost" locations are on the maps.

CC: Mc Daniel
