Nomination #	09-915	Fisheries Scientist	10/30/09 Date
Revision Year:	2010	Habitat Operations Manager	10/30/09 Date
Revision to: Atlas		AWC Project Biologist	8/10/09 Date
Both	✓	Cartographer	11/25/09 Date
Revision Code:	A-2d, A-3		

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
pink salmon	09/05/2008	✓		✓	

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Aerial surveys are flown to document spawning salmon in the Ketchikan management area. During the peak run timing of the pink salmon, aerial surveys are flown daily as weather allows to document escapement. 1,500 pink salmon were present, observed during an aerial survey by an ADF&G biologist in a Piper super cub, in both the lower reaches of the stream and intertidally in Troll Creek as it is known locally.Pink salmon were observed approximately 100 feet above mean low water.
Coordinates (Lat,Long): Upper(55.075,-131.533) Lower(55.070,-131.539)

add local name
add new stream (101-25-10240) less 66cfs w/ pink salmon spawning

Name of Observer (please print): Bo Meredith

Signature: 146.63.250.109 (Web Nomination)

Date: 08/07/2009

Agency:

Address: 2030 Sea Level Dr.# 205 2030 Sea Level Dr.# 205
Ketchikan, AK 99901

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
