**JUSTIFICATION:**

Prior to the hunt, a quota of 8 “any-bull” moose was established for the Copper Basin Community Subsistence Harvest hunt (CM300) in Game Management subunit 13D. This limit was established based on sustainable harvest principles and current population estimates. ”Any-bulls” are bull moose that do not meet state general hunt antler restrictions. The established quota of “any-bull” moose for subunit 13D has been met at this time.

Copper Basin community moose hunters may still hunt in subunit 13D through the end of the regularly scheduled season (September 20th) however, all bulls taken after Tuesday August 28th with a community harvest ticket must meet state general hunt antler restrictions (spike-fork antlers or 50” antlers or antlers with 4 or more brow tines on one side).

The Board of Game allocated up to 70 total “any-bull” moose to the Copper Basin Community Subsistence Harvest Hunt for 2012-13. The following table lists the areas where “any-bull” moose could be taken, the “any-bull” quotas, and the general season antler restrictions for each area.

This emergency order only changes the bag limit in subunit 13D. A previous emergency order was issued for subunit 13A changing the bag limit of that subunit as well. “Any-bull” moose can still be harvested in the remaining subunits of Unit 13, per the table below. All other state hunting regulations still apply, including the closure of the take of all big game in the Paxson Closed Area.

Any Bull Quota	Hunt Area	General Season Antler Restriction
