OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
BWF	2006			x	☑
					☐
					☐
					☐
					☐

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Broad whitefish were radio tagged in the Miguakiak (Mayoriak) River (outlet of Teshekpuk lake) and Teshekpuk Lake in 2003, 2004, and 2005 and in the Meade River in 2005. See attached map, Technical Report N0. 06-04, and January 2007 project update for details and additional justification.

Nominations are based on relocation data obtained between 2003 and 2006 via fixed wing aircraft.

This nomiination is for a tributary to the Meade River from an upstream lake to its confluence with the Meade River. The lake was used by radio tagged broad whitefish as was the tribuitary. All broad whitefish radio tagged in the Meade River (10 fish) were tagged in this tributary just upstream from the confluence with the Meade River.

Add new stream and lake w/ broad whitefish presence

Name of Observer (please print): William Morris

Signature: [signature] Date: 10/12/2007

Agency: AK. Dept. Natural Resources, Office of Habitat Management and Permitting

Address: 1300 College Rd
Fairbanks, AK 99701

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Fish Distribution Database.
