Coho	8-11-87		X	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Coho fry observed in six Deer Bay tributaries 5 miles NE of Hydaburg. Two tributaries enter the Deer Bay ITZ, and four tributaries are a part of the #103-25-10150 complex. I also received verbal reports from other observers of steelhead in the Deer Creek system. Area is currently being roaded and logged.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Jack Gustafson

Date: 10-14-87 Signature: Jack Gustafson

Address: ADFG
Ktn.

Signature of Area Biologist: Jack Gustafson

Coho Fry observed on Field inspection of August 11, 1987

Steelhead also present (based on verbal reports from other observers)
