Broad whitefish	8-20-91		X	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

On Aug 20 I captured a 200mm broad whitefish in a fyke trap set upstream of the Spine Road in the Sakonowyak River. In addition to the broad whitefish we captured juvenile arctic grayling and ninespine stickleback. Detailed information on fish sampling can be found in the technical reports on the gravel mine site project

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
