OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Adult Dolly Varden	7/31/91	Yes			Yes

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

This fish was captured by an angler in Bowhead creek, and reported to have been "colorful". It was tagged in the lower Cripple River on 6/25/91 and was judged to be a potential spawner that would likly spawn in the Cripple River that fall.

Angler reported the capture of this tagged fish to the Nome ADF&G office
