OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Sockeye (O. nerka)	July 22, 28, 2002			X	

ALASKA DEPT. OF FISH & GAME APR 8 - 2003 HABITAT REGION II AND RESTORATION DIVISION

Add Sp to stream

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

Two sockeye were observed at the Toyitna River weir during July 2002. The first fish to pass the weir was a female on July 22. The second was a male on July 28. The weir is located on the Toyitna River ~ 1/4 mile upstream of the Dagislakhna Creek (see attached map). @ 65° 30.960'N 152° 12.950'W NAD 27
