No problem at all, always glad to assist. I'll add a note about the navel to the GNIS entry.....

Take care, A.C., will talk again soon, I'm sure.

Jenny

Not an issue for me, merely an oversight in transferring name to ITM topo it seems.

FYI – Kalasik is Eskimo word for navel according to DAPN

I just wanted to ensure Kalasik Creek was valid name

Thx for confirming and the timely reply

J -

Wow, aren't we fast on the draw? Perhaps you'd like to correspond with Jenn directly? I can also contact Lisa Kok down in Denverfor her input.

Jenn's email is jrunyon@usgs.gov. Please cc me, thanks!

Hi A.C.,

Hmmm, I'm not quite sure what the issue is? Yes, it's in GNIS (FID 01404361, as noted below), and so it is the official name and can be added to your dB. I can't tell right off where GNIS got it from, but since the entry says it was picked up during GNIS Phase I (1979-1982), it was presumably named on whatever the largest scale and/or most recent map there was at the time. That very well might have been the 1:250,000, but that's a perfectly valid source for names. Are you asking if I could look at the various quads to verify it, or are you looking for the meaning of the name? I do know it was not a BGN decision, so there's no subject file on it.

As for why the name wasn't labeled on the 1:63,360 quads, that would be a question for the mapping center, i.e. Lisa?

Just let me know and I can check the map library/placename books.

Cheers.
Jenny

Subject Kalasik Creek, AK AWC# 334-35-11000-2091-3115

Hi Jenn,

Got this hot over the wires today...

Stream name "Kalasik Creek" (tributary of S. Fork Nulato River) is shown on USGS 1:250,000 scale map (NortonBay, but not Nulato) however name does not appear on creek on Norton Bay C-1 or Nulato C-6, nor is it listed in Dictionary of AK

Place Names. Identified in NHD - GNID is 01404361, Reach code 19040705010510. I would like to add this stream name to dept dB but .....Could you sent a query up the line?

Let me know what you find out.

Best, AC
