Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

Coho fry were shocked at the sites indicated on the map. A bedrock barrier is located on the mainstem. Dolly Varden and cutthroat were also present. Both spawning and rearing habitat was present. A 15' falls on the mainstem is planned to be laddered in 1994.
