**JUSTIFICATION:**

The Alaska Board of Game established a moose registration permit hunt in Unit 22(C) which is administered with a quota to prevent overharvest. The moose population in the combined Unit 22(C) and Unit 22(B) survey area increased at a rate of 5% annually between 2016 and 2022. Additionally, bull:cow ratios obtained from composition surveys in Unit 22(C) completed in 2018 and 2021 were estimated to be 31B:100C during both years.

For regulatory year 2022-2023, the Department established a harvest quota of 25 bulls in Unit 22(C) in response to the observed population increase and bull:cow ratios consistently above the management objective of 20B:100C. The fall harvest quota of 25 bulls is expected to be reached by the season closing date announced in this emergency order and no further harvest is warranted.
