Fish Distribution Database

X

Region: Southcentral

USGS Quad(s): Kenai B-3

Fish Distribution Database Number of Waterway: 244-30-10010 -2041

Name of Waterway: ☐ USGS Name ☐ Local Name

☑ Addition ☐ Deletion ☐ Correction ☐ Backup Information

For Office Use

Nomination #	05-508		
Revision Year:	2007	ADF&G Fisheries Scientist	1/6/06 Date
Revision to:	Atlas ____ Catalog ____ Both X	ADNR CHMP Operations Mgr.	1/6/06 Date
		FDD Project Biologist	11/17/05 Date
Revision Code:	A-2	Cartographer	2/8/06 Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	09/30/2005		✓		✓

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Add new stream w/ COR

2 Juvenile Coho trapped at this location, a tributary to the Kenai River. More and better habitat upstream, but not trapped. Lower reaches ditched and drained - good site for potential restoration.

*see shapefile
Coordinates (Lat\Long): Upper(60.4893\-150.9960) Lower(60.4858\-151.0025)

Name of Observer (please print): Robert Ruffner

Signature: 209.112.190.216 (Web Nomination) Date: 11/14/2005

Agency:

Address: 44539 Sterling Hwy. #202
Soldotna, AK 99669

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Fish Distribution Database.

ftp://ftp.state.ak.us/transfer/fdd/

Larry
the pdf I created is too large to email so I placed it on the SOA FTP server
click on the above link to access file
I created three maps that show large areas, orange dot represents upper limit of nom observations
Orange line represents Robert's arcs
last 6 maps show area of each noms upper limit in detail
hope this helps
I'm taking the rest of the day off
Let me know Monday what you think.

Sure, maybe I can figure out the general location. That'd be OK. Thanks.

Larry
thx for the timely reply
I'll have to scan the maps I used to create cartographers instructions but they offer only a small view of the area and may not provide much. Robert did supply lat/long. I can plot those on a map and send it to ya as a pdf if that will work.

Good morning,

Well, I have the utmost faith that Robert correctly identified the rearing, juvenile coho and no doubt he and/or Mary recognize spawning adult coho. Therefore, I do not have any reservations about recommending the inclusion of these locations into the catalog. However, just for the educational exercise, I'd like to know exactly "where" these new catalog entries are.. How difficult would it be view a map? Thanks.

Larry

Larry
Since George is out, I've forwarded this to you since I'd like to get these looked at sooner than the 15th, if that's possible.

Subject: Nominations

Greetings

I received six nominations from Robert Ruffner to add data to the FDD.
All involve the addition of tributaries to the Kenai River w/rearing or spawning coho salmon.
I'd appreciate it if you could take a look at these nominations and supply a dept endorsement.
I can mail copies of the noms for you to review and sign or I can scan them as pdf and you can send me cover sheet w/signature if you decide to endorse

them. Mary King accompanied Robert on a few of his trips.
How would you like to proceed?
