Nomination #	130100		
		Fisheries Scientist	Date
Revision Year:	2014		
Revision to:	Atlas ____ Catalog ____ Both ____	Habitat Operations Manager	Date 11/18/13
		AWC Project Biologist	Date
Revision Code:	F-1		
		Cartographer	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Sockeye Salmon	June 10, 2013 ~12:20pm.			Present	☑
					☐
					☐
					☐
					☐

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: I observed a female sockeye (Oncorhynchus nerka) just downstream of the Chester Creek pedistrian bridge adjacent to Spenard Road at the beginning of Westchester Lagoon. The salmon was enter: the creek. I could see several net marks across it's back. I got a good look at it and positively identified the specie.

Name of Observer (please print): Michael D. Travis

Signature: Michael D. Travis

Date: 6/12/13

Agency: Travis/Peterson Environmental Consulting, Inc.

Address: 3305 Arctic Blvd S102
Anchorage, AK 99503

ALASKA DEPT. OF FISH & GAME
JUN 18 2013

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

Subject: AWC nom # 13-100

Michael

The dept received the nomination form you submitted to add sockeye salmon present to Chester Creek, (AWC# 247-50-10050). Your observation is of particular interest as presently sockeye salmon are not listed in the AWC for Chester Creek. However, dept policy requires that nominated revisions to the AWC be based on observations of at least two fish of the same species and life stage at the point in a water body. Also a photo or two would be appreciated to verify species identification as dept staff will need to certify your observation before it can be incorporated into the AWC. Contact me if you have any questions.
