Nomination #

Carl Yanagawa 10/30/84
Regional Supervisor Date

SJS 11/5/84

Drafted CP 10/84 Date

Name addition:

USGS name unNamed

Local name Two-Moose Crk

Species	Date(s) Observed	Spawning	Rearing	Migration
Dolly Varden	7/80 to 10/80, 5/81 to 10/81		X	
Chinook	7/80 to 10/80, 5/81 to 10/81	X	X	
Coho	7/80 to 10/80, 5/81 to 10/81	X	X	
Steelhead	7/80 to 10/80, 5/81 to 10/81		X	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Tributary of Anchor River, mouth located SE 1/4 Sec 11 T5S R15W Seward Meridian (Mile 159.7 Sterling Hwy) collection of juveniles in 1980 accomplished by electroshocking, collection of juveniles in 1981 accomplished by minnow trapping. Sporadic sampling has occured in 1982, 1983, + 1984 Adult Chinook + Coho observed at these times. Sampling has taken place in lower 1/2 to 3/4 mile of creek only, All species probably ~~re~~ represented above this point.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Comments/discussion:

Tom Ballard Believes all D.V. Trapped to be anadromous for following reasons

1) He feels ~~[illegible]~~ all D.V. in system are anadromous.

2) Presence of other salmon means there is no barrier.

3) Proximity to saltwater

4) Past tagging studies in the anchor River
