

Areas Closed to Black Bear Baiting in Unit 6D, Prince William Sound

You may not bait black bears in Unit 6D unless you have completed an ADFG Bear Baiting Clinic. Please refer to the current Alaska Hunting Regulations for more information. More than 85% of successful hunters in PWS do NOT use bait. “Spot and stalk” hunting is much more effective than baiting in PWS, and less troublesome than hauling bait.

The increase in recreational activity, developed campgrounds, and high bear harvest has necessitated the restriction of bear baiting in certain locations in PWS. Bays that are closed to bear baiting are as follows:

- Harriman Fiord and drainages, beyond a line across the narrows of Barry Arm.
- Blackstone Bay and drainages, from Decision Point to Blackstone Point.
- Chenega Island
- City of Valdez- specific area closed to the discharge of firearms

You may not set a bait station within 1 mile of a dwelling, developed recreational facility, or campground, nor within ¼ mile of a road or maintained trail. It is your responsibility to determine if a bait station location is legal. A partial list of dwellings and campgrounds in PWS is as follows:

US Forest Service Cabins

Name	Latitude	Longitude
Coghill Lake Cabin	61.07534	147.86705
Pigot Bay Cabin	60.84251	148.39857
