Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration
Coho salmon	10-9-86		X	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Rearing habitat good. A clear cut approximately 50 ft wide (north-south) just east of section line between sections 11 and 12 has left a couple large spruce would block adult fish. Trees have been cut recently and left a lot of debris in stream. COr were taken 1/3 mile above clear-cut

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Durand R. Cook

Date: 10-13-86 Signature: Durand R. Cook

Address: ADF+G, Habitat Div
Anchorage, AK

Signature of Area Biologist: Larry Engel
