Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Most of the surveyed portion flows through swampy ground in which many small fish were observed. Only a couple fish were taken to varify species. Habitat above survey looked good but time prevented further investigation.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
