Species	Date(s) Observed	Spawning	Rearing	Migration
Coho salmon	9/26/86	X		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

observed at least five adults in spawning coloration, but otherwise good condition, in two locations in R 11W, T 27N, Section 12 — at and near conjunction of two channels shown on USGS topo map that are tributaries of Wetbutt Creek — several hundred meters west of northernmost airstrip — only one airstrip shown on topo map.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
