Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Gravel extraction has created pond habitat and the rechannelization of stream #2015 as indicated on accompanying map. Escapement counts have been completed in 1983 + 1984; minnow trap sampling has indicated the extent of the rearing habitat.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
