Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

THE PRESENCE OF COHO SALMON THROUGHOUT THE WETLANDS IN THE VICINITY OF THIS POLYGON, THE SUITABILITY OF HABITAT AS DETERMINED BY LOW-LEVEL HELICOPTER OBSERVATIONS, AND THE LACK OF ANY BARRIERS TO FISH PASSAGE ALL INDICATE THAT COHO SALMON UTILIZE THE MANY SMALL CHANNELS WITHIN THE INDICATED POLYGON.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
