Species	Date(s) Observed	Spawning	Rearing	Migration
CO	8/24/88		✓	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

PRESENCE OF REARING COHO SALMON IMMEDIATELY DOWNSTREAM OF DESIGNATED STREAM REACH, SUITABILITY OF HABITAT (BASED ON LOW-LEVEL AERIAL OBSERVATION), AND LACK OF ANY BARRIERS TO FISH PASSAGE ALL INDICATE THAT COHO SALMON UTILIZE THE DESCRIBED STREAM REACH.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Species	Date(s) Observed	Spawning	Rearing	Migration
Coho Salmon	07-20-88		XX	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Numerous juvenile coho salmon (≈20) ranging from 1-3 inches were taken in a minnow trap which soaked 1 hour at the Petersville Road crossing. Water level in stream was low.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
