Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration
Pink Salmon	Nov 7, 1990	X		
Coho Salmon	Nov 7, 1990	X		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

12 coho salmon were observed holding over redds in this creek that flows through a culvert on Dairy Hill Lane into the Seward Lagoon. 1 pink salmon carcass was also observed in this stream. Overgrazing by horses adjacent to this stream limited the distribution of fish to the lower section of stream.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
