| | | | | |

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Local people notified us of chinook spawning (at least 10 fish), I observed from the air one (1) live and one (1) dead chinook salmon several miles upstream from the mouth.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Kenneth Roberson
