OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
KING	July	X			✓
COHO	August	X			✓

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Chulitna River (and Coal Creek) is closed to King fishing - Kings are visible from the air in lower ½ mile of Creek during aerial escapement survey (Coal Creek is not surveyed). Coho are visible in Creek by mid August. I don't know how far upstream coho go.
There is a well-hidden fish camp at the mouth of Coal Creek. Access is by raft down Chulitna River or by trail from Lake.

SUBJECT: Anadromous Stream Catalog updates.

Upon looking through the latest anadromous stream catalog I see some additions you could possibly add next year. They are:

Quad. Map	Name	Location	Species/ Activity	Comment
Tyonek B1.	Beaver Cr.	T16N,R5W,14,15	$CO_{s,r}$; PS_s	Trib. to L. Su.
Tyonek B1 downstream of # 2100	None	T16N,R5W, 10,11	$CO_{s,r}$	Enters L. Su 100 yds
Tyonek B2.	Granite Cr.	Stream # 3017	CO_s	Trib. to Alexander Cr.
Talkeetna B1.	Cache Cr.	T26N,R5W,21,22, 26,27	$CO_{s,r}$	Parallels Chulitna R.
Talkeetna B3.	Treasure Cr.	Stream # 4115	$CO_{s,r}$	
Talkeetna Mts. B6.	Larson Cr.	Stream # 3080	K_s; CO_s; CH_s	
Talkeetna Mts. D6.	Coal Cr.	T32N,R3W,4	K_s; CO_s	Chulitna R. Tributary.

Thanks.
