HOMER FISH & GAME ADVISORY COMMITTEE

November 06, 2007

*Att's BOF  
UCI AC  
Comments*

Members Present: Marv Peters, Trina B. Fellows, Michael Craig, Lee Martin, Cliff Calkins, George Matz, Thomas Hagberg, Frank Mullens, Skip Avril, Mike Scruggs, Dave Lyons, Gus Van Dyke

Members Absent Excused: James Meeses, Tom Young, Joey Allred, Pete Wedin.

RECEIVED  
NOV 08 2007  
BOARDS

No Fish & Game Biologist present.

Frank Mullens: Gave a short talk on dealing with the Board of Fish for 30 years. The Board never has F & G staff's scientific studies, reports or recommendations. Set Netters have went to F&G and not been able to get information. *AC's need staff information earlier, so it can be considered at AC level*  
We have concerns with the listed board members: Jeremiah Campbell, John Jensen & Larry Edfelt. *Regarding fishing violations which in at least 2 cases could result in AC members losing their seats*

Proposal 74 & 75

We did not vote on these two proposals- the advisory board did not feel that Spotter pilots are a problem. We believe economic will take care of this.

Proposal 77            0   0   12 Oppose

We don't believe anyone is suffering with the Blanchard line as is. Let the fish managers manage the fish.

Proposal 187            11 favor   1 abstains

Don't know enough about Upper Cook Inlet fishing. *-refers to abstention*

Proposal 188            10 favor   1 abstains   1 oppose

Don't know enough about Upper Cook Inlet commercial fishing. The management plan is fine as is. *per opposer*

Advisory Board Member George Matz was excuse early to attend another meeting.

Proposal 194            8 favor   1 abstain   2 Oppose

Lost economic for Commercial fishermen - over escapement. Not knowledgeable about Kenai River fish.

Proposal 195            10 favor   1 abstain

Proposal 202            0            1 abstain   10 Oppose

There has been over escapement - even with the entire in river fishers (Dip net, Rod & Reel) - There needs to be more Commercial Openings. Managing the river should be left to the F&G Biologist. Not politics.

*p 1 of 2*

A/C Comment#

Proposal 206 11 favor 0 0

Proposal 207 0 0 11 Oppose

This is a habitat issue. With increased Bag Limits comes more people and boats using the River. This would devastate the riverbanks and pollute the water more than it is. This is so greedy.

Proposal 212 2 favor 1 abstain 8 Oppose

This was a good management plan. Should have been left that way.

Proposal 213 4 favor 1 abstain 6 Oppose

If runs are slow early on and commercial fishing is closed - so should dip netting and Rod & Reel be closed?

Proposal 221 8 favor 1 abstain 2 Oppose

Have never dip netted. To restrictive for people with boats that will only fish one day.

Proposal 222 0 1 abstain 10 Oppose

Proposal 224 0 0 11 Oppose

You can now get your winter food with Rod & Reel. Or you can dip net if you are an Alaska resident.

Proposal 392 2 abstain 9 Oppose

Marv read proposal to the Advisory board from a mail out. Subsistence Shell Fishers-

Open Tuka, Jakalof. Expand Subsistence shell fishing. We believe there are enough areas open for all user groups now.

Meeting Adjourned 8:30

*I got this from F&G staff - never saw a mail out*

*BOF UCI*

A quorum is present for the meeting to continue.

- Approve minutes from meeting  
Minutes were corrected as follows:  
Minor typographical and spelling changes
- Calendar of events:
  1. Interior Region BOG Feb 29th meeting-proposals due by 12/7/07
  2. Upper Cook Inlet Finfish comments due by 1/18/08

The BOF will hold meetings in Soldotna and Wasilla

3. Comment for Chignik Finfish and Kodiak due 12/27
4. Next meetings 12/5 MTA large room, 12/19 Wasilla High, this will be our election meeting!! We will have 4-6 seats up plus 2 alternates plus officers.  
Vacant seats from Nick Mihalow, Howard Delo and Charles Keeter empty, Steve Darilek, Danny Green, Bill Folsom, Gerrit Dykstra, and Bruce Knowles has 2 years left, Steve Runyan 1 year left. Steve and Bruce expected to go to USVFGAC
5. ACR deadline is 12/11 for statewide Jan meeting (game)

6. Jeff Fox - Soldotna office, will be here Jan 9. Patti Nelson com fish should be invited. New sport fish director, Charlie Swaton, needs an invite as well. We should invite local legislative reps as well.
7. Coho problems again.

- Correspondence Received:

1. Email from Bill Romberg re: sportfish economic survey update.

- Reports and Comments:

1. Recognize guests and/or department staff:

Howard Delo BOF, Cliff Judkins BOG, Sam Ivy Staff, Dave Rutz Staff

2. Other announcements and/or agenda items?

- Old Business:

1. No response from Joint Board yet.

- New Business:

1. Public Comment.

- A) Cliff Judkins - will be discussing sc region and asked if we have any concerns that need to be brought up notify him.
- B) Denny met with several people about subsistence scoring, and verified how the scoring was done last season.
- C) Cliff may do a power point presentation at election meeting for predator control, \$400,000 for board for information on predator control.
- D) Alaskans for professional wildlife management new group needs our support.
- E) \$ was allocated for board support, where is our computer? supplies?
- F) Gov's request how to spend surplus monies
- G) F&G Dept directory, should have one. Chairman should request them

2. Fish Sub Committee Recommendations (minutes from meeting attached)

Mark Vingoe motion to support sub committee's recommendations except 55,139, 160, 161, 162 and 164

second Mark Chryson

all were unanimous support/oppose comments were done on each. ADF&G staff had input in sub committee meeting.

motion passed

13-0-0

Synopsis of these are as follows:

**Opposed Proposals**

# 111, 112, 113, 115, 125, 126, 127, 128, 129, 130, 131, 133, 134, 135, 136, 137, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 154, 155, 156, 157, 158, 159

**Supported Proposals**

# 74, 75, 114, 116, 117, 118, 119, 120, 121, 122, 123, 132, 138, 140, 163, 165

**Take no Action on Proposals**

# 124, 153

Andy Couch motion to support 139 seconded by Bennett Durgeloh

Proposal affects in river guide operations as well as commercial.

Fishing lodges have shut down

We should look at all of Alexander creek

Last years count was 400 kings

Much of the mouth catch is transient fish

Pike destroyed the fishery,

Motion to table until sub committee can review all proposals regarding this issue

13-0-0

Andy Couch motion to support 160, 161 & 162 seconded by Bennett Durgeloh

Central district management plan protected salmon passing through

now it doesn't have the safety provisions in there.

162 is fine to delete plan as long as you restore old northern district plan see 138

we want the dept to go for mid range of the escapement goal.

Andy Couch motion to separate 160 and 161 from this discussion, seconded by Bennett Durgeloh

Motion to separate passed 13-0-0

# 162 tabled until word-smithing is done.  
13-0-0

Andy Couch motion to support 160 & 161, seconded by Bennett Durgeloh

Actually wants to modify plans to give more fishing to upper cook inlet commercial fishing. They want unrestricted fishing in 160,

motion withdrawn with second's consent.

Andy Couch motion to support 160, seconded by Bennett Durgeloh

Suggest we vote down proposal and suggest we adopt 138,

This proposal will intercept our northern salmon

motion failed

0-13-0

Andy Couch motion to support 161, seconded by Bennett Durgeloh

tabled until 162 resolution  
12-1-0

Andy Couch motion to support 55, seconded by Bennett Durgeloh  
Is a proposal for Kodiak meeting Cook Inlet commercial fishermen are using all the same logic on Kodiak fishermen intercepting salmon as we have been trying to use on them..

Motion passed 12-0-1  
majority comment

This is a good concept and should be applied across the state in all instances when mixed stocks are involved including passing salmon through to northern district of cook inlet.

Andy Couch motion to support 164, seconded by Bennett Durgeloh

We are confused in what this regulation is supposed to do.  
Doesn't state management time or goals  
How will the coho be affected????

motion tabled date certain.  
13-0-0

3. Report on meeting with Staff/Subsistence. (see above denny's comment)
4. Review/vote on any Interior region proposals if needed - none-
5. Discuss /vote on Upper Cook Inlet proposals -none

Meeting For 12/5 cancelled .

Our next meeting, elections on December 19th at Wasilla High School, 7:00 pm.

3 incumbents may run again

Meeting adjourned 9:30

**RECEIVED****DEC 17 2007****BOARDS  
ANCHORAGE**

**MVFGAC Fisheries Sub Committee Meeting  
11/26/07**

Adjust Northern District Salmon Management Plan in such a way as to provide a high likelihood that sockeye salmon escapement counts through the Yentna River Sonar can be projected as meeting or exceeding the midpoint of the sockeye salmon escapement goal range by July 23 two out of every three years between board meetings.

Needed specific language in management plans to provide allocations for all users in Upper Cook Inlet – without specific language the commercial manager makes allocation decisions that affect all user groups in Upper Cook Inlet. Aside from early and late run king salmon and coho salmon most available fish are allocated entirely to the commercial fishery without specific language. Without specific language, the commercial fleet is allowed to harvest all of the available harvest as long as escapement goals are met – limited only by the commercial fleet's ability to harvest those fish.

Achieving mid range escapements to all systems takes priority over harvesting salmon in a mixed stock fishery to avoid Sustainable Escapement Goal (SEG) over escapements of salmon into specific stream systems. Something lacking in Upper Cook Inlet has been escapements of salmon so large that they do not reproduce themselves. Such escapements are needed to obtain Biological Escapement Goal (BEG) escapement determinations -- without BEG ranges defining the upper and lower bounds of desirable escapements -- thus, excessive harvesting of fish based on current SEGs could have a detrimental or less than desirable effect which could minimize rather than maximize benefits from Upper Cook Inlet fisheries.

Provide high enough numbers of sockeye returning to Yentna / Northern area so that Fish Creek personal use sockeye salmon fishery has some type of yearly allocation and / or July sport fishing opportunity. Without specific language there has been no personal use fishery for Fish Creek sockeye in XX years – there is also no sport salmon fishery during the entire month of July in Fish Creek.

Since the Departments ability to predict escapements to specific river systems only obtains accuracy after July 23 on most years, ADF&G should manage the Inlet on a conservative basis until at least that date. If inseason data after July 23 indicates surplus harvestable salmon are available, then extra commercial harvest opportunity may be allowed – but only where it does not interfere with obtaining midpoint escapement ranges throughout Upper Cook Inlet on most years.

Subsistence fishery harvests on Yentna River have been shorted because of lack of escapement -- The Yentna / Susitna sockeye sport harvest has also been closed during several recent years. Both of these fisheries need specific language within management plan(s) to ensure enough sockeye salmon reach the river system to provide a subsistence and sport fishery without robbing from the identified sockeye salmon escapement goal range.

Request a review of the allocation criteria for all salmon management plans in light of the current economic situation. The price of commercial caught salmon has dropped significantly since this was last done, while at the same time significant inflation has occurred as well. Economics need to be considered in order to more accurately allocate Upper Cook Inlet salmon fisheries for maximum benefit for all the people of Alaska.

Provide consistent and predictable coho salmon escapements into the Northern District streams throughout the coho run timing between early July and mid September so as to maintain a viable sport fishery for a species whose highest economic value is reached through a targeted sport fishery.

Northern bound chum salmon have suffered a decline in abundance as evidenced in the catch record history for both the commercial fishery in upper Cook Inlet and also in the Susitna River tributary sport fisheries. The declining trend of chum salmon bound for the Susitna River was identified by the Board of Fisheries in XXXX, and that BOF created a specific pass through period restricting the Upper Cook Inlet Drift Fishery, and directed ADF&G to write a chum salmon

MVFGAC Fisheries Sub Committee Meeting  
11/26/07

management plan. The Matanuska Valley AC requests a chum salmon management plan be created for Northern bound chum salmon including measured escapements of chum salmon to 3 or more streams. Escapement goals should be developed over time for chum salmon as well.

Proposal #65 by Upper Cook Inlet Drifts Association (UCIDA) for Kodiak Island commercial fishery requests restrictions on the Kodiak commercial fishery in order to obtain sockeye escapements and harvesting opportunities benefitting Upper Cook Inlet users. The Matanuska Valley AC requests this same concept, using classic salmon fishery management, as proposed by UCIDA be utilized in Upper Cook Inlet to pass Northern bound salmon through the Central District until at least the mid point of the Yentna River sockeye salmon goal range can be projected on or after July 23 on a yearly basis.

Proposals #74 & 75 would eliminate use of spotter aircraft in Upper Cook Inlet. supported 4-0 by Matanuska Valley AC fisheries subcommittee -- unless aircraft are used to increase numbers of Northern bound salmon reaching Northern District streams.

Fish Creek stocking -- escapement goals adjusted downward by a previous BOF to reflect only wild sockeye -- ADF&G continues counting all sockeye as escapement toward this adjusted goal -- so in order to correctly count Fish Creek sockeye the Board should remove sockeye stocking program from Big Lake / Fish Creek.

Increased sport coho limits favored by the AC -- if there are enough coho to remove commercial restrictions formerly found in the coho salmon conservation plan (done at the 2005 BOF meeting) then the limit restriction to the sport fishery provided by the same plan should have been removed as well. If there are not enough surplus coho to do this, and still obtain adequate coho escapements on a yearly basis, then out of fairness the BOF should reinstate the commercial restrictions. Especially considering Northern bound coho have been identified in a management plan to be managed primarily for the sport fishery / recreational purposes.

Mention should be made of flood conditions that will decrease future Northern bound salmon returns -- in particular chinook and coho -- some adjustment to future fishing opportunities seems necessary in order to reach desired future escapement levels.

Nov. 26, 2007 Fisheries Sub Committee

Proposal 111 -- unanimously opposed 0-4. moving fishery farther off the Eastside of Cook Inlet would likely increase the harvest of Northern Bound salmon which have failed to reach escapement objectives most years, while late run Kenai king salmon have been making escapements most years.

112 & 113 -- unanimously opposed 0-4 because of impacts of additional harvests this would create.

114 -- unanimous support 4-0 we support this as a housekeeping proposal that may simplify regulations.

115 -- unanimously opposed 0-4 Could reallocate a lot of salmon away from the public use.

116. -- unanimously supported 4-0. prioritizes salmon for public users and would increase the likelihood of reaching midpoint escapement levels for all species of salmon in Upper Cook Inlet.

117. Unanimously supported 4-0.

118. Supported 4-0. Current large sockeye escapements to the Kenai system have continued to produce large returns along with harvest opportunities for all user groups.

MVFGAC Fisheries Sub Committee Meeting  
11/26/07

119. 4-0 Supported.

120. 4-0 Support. While commercial managers claim that chum are not harvested as much because of the higher price for sockeye salmon and the lower price for chum salmon, this has always been the case in Upper Cook Inlet if the same number of chum salmon were still available harvests should have remained relatively static. In addition, sport fish harvests on the East side tributaries of the Susitna River have also declined dramatically further showing there has in fact been a decline in Upper Cook Inlet chum salmon.

Steve Runyan arrives will be reflected in later votes.

121 & 122. 5-0 Support. This would provide some salmon harvest for inriver uses without robbing from the salmon escapement. An even better solution would be for the Board of Fisheries to direct the commercial manager to manage using the mid point of the Yentna goal as the target rather than attempting to barely make the lower end of the goal. Common sense is that if the Department attempts to meet the very bottom end of the goal then 50% of the time the escapement would be below the minimum and 50% of the time would be above. While we view a 50% success rate as unacceptable for meeting escapement objectives -- The Department has failed to meet even that level of success.

123. 5-0 Support.

124. No Action -- we have not seen any new language to comment on as of late November.

125. opposed 0-5 unanimously. This would take away harvest opportunities from the greatest number of users in Upper Cook Inlet and increase the likelihood of missing escapement goals other than the Kenai River sockeye goal.

126. opposed 0-5 unanimously. Emergency Orders over ruling management plans need to be justified.

127, 128, 129, 130, 131. Opposed 0-5 unanimously. We believe achieving at least the midpoint of all goals should have priority over exceeding upper end of escapement goals elsewhere in Upper Cook Inlet.-- especially when current Upper Cook Inlet Goals are Sustainable Escapement Goals and not Biological Escapement Goals, and thus the upper end of productive escapements has yet to be established.

132 -- Support 5-0. We definitely prefer the Board of Fish and ADF&G achieve the midpoint of the Fish Creek sockeye and Yentna sockeye goals, however, we support achieving each minimum goal as a priority over not exceeding a maximum Sustainable Escapement Goal somewhere else.

133, 134, 135, 136, 137. Oppose 0-5 unanimously. These proposals would dramatically reduce harvest opportunities for sport and personal use fisheries much more than they would increase commercial harvest opportunities. The state's fisheries shall be managed for maximum benefit.

138. Support 5-0 Unanimously -- This management, while better for Northern Bound salmon must also be strengthened. We encourage the Board of Fisheries to view this plan as a way to come close to reaching the minimum Yentna sockeye goal on about half of the years, however we also encourage the Board to implement changes aimed at reaching the midpoint of the goal on a minimum of half of the years.

MVFGAC Fisheries Sub Committee Meeting  
11/26/07

The Sustainable Salmon Fisheries Policy calls for spawning escapements scattered throughout the goal range – current management ignores this concept for Northern bound salmon stocks managed by the Yentna River sockeye salmon escapement range since current management practices result in less than minimum range escapement levels on most years.

Andy Couch left meeting.

139. Support 4-0; this will allow limited fishing on Alexander Creek, further restrictions might be added such as fishing restricted to within a ¼ mile of the mouth. Some of the fish caught here will be kings moving up river.

140. Support 4-0; this proposals clarifies obtaining the Yentna River sockeye salmon escapement goal shall have priority over staying within any upper Kenai River goal. An amendment should be made directing that the commercial fish manager shall manage to obtain an average mid-range of the Yentna goal through time. When the commercial manager fails to meet even the absolute lower end of the escapement range no harvestable surplus exists for sport or personal use opportunities. The only inriver fishing allowed under such low returns is subsistence fishing -- and even subsistence harvests should not have to rob from needed spawning escapements. Without specific language to this or other management plans the Board of Fish would be supporting the current practice of allowing the commercial fish manager to continue ALLOCATING all of the Yentna River sockeye salmon harvestable surplus to the commercial fishery PLUS a portion of the Yentna River escapement goal. ADF&G records show this happens on most years in Upper Cook Inlet. Since the Yentna River sockeye salmon escapement goal is the only bench mark used by the ADF&G manager during the entire month of July the current management strategy likely at times also allocates most if not all the harvestable surplus and a portion of necessary escapements of all Northern bound sockeye, pink, chum, and coho salmon to the commercial fishery during July.

141 - 150 Oppose 0-4-0; these proposals ask for liberalizations in the Northern District set net fishery at times when coho and king salmon are at peak abundance levels. Such liberalizations would reduce harvest opportunities from the sport fishery to provide additional allocation to the commercial fishery. King salmon and coho salmon are the most important species to the sport fishery and provide maximum economic benefit when harvested by the sport fishery. Less than 100 commercial permits are fished in the Northern District, while thousands of sport fishermen fish Northern District stream drainages annually. If passed these proposals would clearly be penny wise and dollar foolish.

151, 152 Oppose 0-4-0; these proposals seek to open drift net commercial fishing in areas of Upper Cook Inlet at times when early run king salmon are at peak abundance levels. Opening such fisheries to drift gillnets would allocate an extremely valuable resource away from the sport fishery to a commercial fishery where there would not be enough resource available to make economic sense for the number of commercial drift netters that could participate. If these proposed fisheries are allowed to occur Northern District king salmon could be severely damaged. The Northern District king salmon fishery is set up with a maximum harvest cap of 12,000 king salmon, and not an allocation. It should be noted that the king salmon fishery proposed in 151 under the Northern District King Salmon Management plan would not even occur in the Northern District, and thus has no place in the plan. In addition, the Alaska Department of Fish and Game currently has management concerns for Northern king salmon stocks based on the effects of inriver floods during the late summer of 2006. Early indications are that king salmon production will be decreased for the next few years as a result.

153. No Action

154-158. Oppose; 0-4-0; these proposals seek to expand current

MVFGAC Fisheries Sub Committee Meeting  
11/26/07

commercial pink salmon fisheries for a fish with low economic value. Such action would consequently expand commercial harvest of coho salmon at the expense of sport fisheries. Coho salmon are one of the most valuable salmon species to the sport fisheries.

159. Oppose 0-4-0; this would allow unlimited pink fishing and greatly increase the coho by-catch.

\*\*\*\*\*160-162. Oppose 0-4-0; these proposals would greatly increase sockeye salmon harvest and greatly increase the harvest of all Northern District salmon.

163. Support 4-0-0; this eliminate the new drift areas established at the 2005 board meeting and puts the drift fleet back in the old three mile corridor. This should help increase needed escapements of salmon to Northern streams systems.

\*\*\*\*164. Support 4-0-0; these is a house keeping proposal it clarifies what can be done from 1 Aug. when one plan end to 11 Aug when another plan starts.

165. Support 4-0-0; this would proposal would reinstate the sun setting previsions of the 2005 west side of Cook Inlet drift fishery during Aug.

AC Comments  
UCI 130*

Fish Proposals:

- 206: 9 in favor, support because it doesn't hurt economies as bad as closing it-reducing harvest to 1 sockeye.
- 207: 8 in favor of increasing limit, same reason as 206, great management tool.  
1 opposed-no one needs that much salmon
- 208: no action
- 210: 9 opposed, not a sufficient stock to sustain commercial fishing
- 211: 9 opposed, personal attack on personal use fishery
- 212: No action
- 213: No action because of vote on 211
- 214: 5 in favor, it's fair, good idea  
3 abstain, doesn't pertain  
1 opposed
- 215: 4 in favor, great management tool  
5 opposed, too many fish, waste
- 217: 9 opposed, not enough for dipnet
- 218: 9 opposed, too hard to keep track of
- 219: No action (217)
- 220: 9 opposed, everyone would have to get new dipnets
- 221: 9 in favor, good idea for clean water
- 222: No action (221)
- 223: 9 opposed, too deadly
- 224: 9 opposed, would be too easy to abuse

Cooper Landing Fish and Game Advisory Committee  
Meeting Minutes 12/4/07

- 236: 2 in favor, might draw more lake activity  
7 opposed, keep work down
- 237: No action
- 238: No action
- 239: 9 in favor w/ following amendment:  
Skilak-Upper Killey closed to fishing all species May 15-June 11
- 240: No action
- 241: 9 in favor, good idea for management tool
- 242: 9 in favor, because it is ours
- 243: No action
- 244: 8 in favor, 1 opposed (he likes barbs)
- 245: No action
- 246: 9 in favor w/ following amendment:  
no intentional anchor dragging throughout Kenai River
- 247: 9 opposed, not healthy for system
- 250: 9 in favor, kill all pike
- 251: 9 in favor, as amended by ADFG
- 252: 9 in favor
- 253: 8 opposed, enforcement issues  
1 abstained
- 254: 9 opposed in apecific area, community supports youth fishing.

Meeting will resume at 6pm, Dec 12.

BOARDS  
ANCHORAGE

Kenai ComFish Biologist: Jeff Fox

Proposal 55 2 Favor 6 Oppose 5 Abstain

Reallocation of fish- not an acceptable solution- does not happen every year. Not a lack of fish in Cook Inlet or the Kenai River. Don't know enough about the issue.

Proposal 74/75 1 Favor 12 Oppose 0 Abstain

This is not an issue - Using a Spotter is not economical.

Proposal 76 0 Favor 12 Oppose 1 Abstain

Proposal 95 13 favor 0 Oppose 0 Abstain

Monday & Friday are workable days for commercial- this is a good proposal for personal use fisheries.

Proposal 102/103 13 favor 0 Oppose 0 Abstain

Proposal 107 13 favor 0 Oppose 0 Abstain

Good economics- less gear & boats in fishing area.

Proposal 116 0 Favor 13 Oppose 0 Abstain

Reallocation - there is plenty of fish in the Kenai River for all personal use. The River and River bank can't stand up to anymore boats & people. Cook Inlet Sockeye should be managed for commercial fishermen.

Proposal 127,128,129,130,131 13 favor 0 Oppose 0 Abstain

Proposal 132 0 Favor 13 Oppose 0 Abstain  
Allocation issue- leave management of Kenai River salmon to the Biologist.

Proposal 160 8 Favor 1 Oppose 4 Abstain  
The 1999 Management Plan is unmanageable. Don't know enough about this issue.

Proposal 161 9 Favor 1 Oppose 3 Abstain

Proposal 165 0 Favor 13 Oppose 0 Abstain  
Counter productive

Proposal 166/167 13 Favor 0 Oppose 0 Abstain

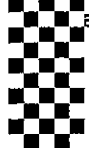

Proposal 199 13 Favor 0 Oppose 0 Abstain  
We prefer escapement goal range of 400/700- we approve other parts of this proposal

Proposal 277 3 Favor 8 Oppose 2 Abstain  
We do need to curb nonresidents exporting so much fish-They sell salmon at Flea Markets- How would it be enforced?

Proposal 282 12 Favor 0 Oppose 1 Abstain  
Don't know enough about the Kenai Coho.

A Big Thank You to Jeff Fox for coming down to Homer.

motion to support 171  
Guided SF regulations within a CF mgmt plan. Agree with the concept, but not clear why it is written in this way. Would like more clarity before voting.

motion withdrawn until jan 9th

motion to support 330 as amended by sub committee

limited fishery, early fishery  
suggested 2 per season limit, enforcement problems, sucker creek only spawning habitat left due to pike  
Dave Long - commercial does daily reporting could help.  
dept does not support as it was written because data changed

Alexander Creek king salmon fishery has not met escapement goals for several years. Not anticipating goals will be met this year, either. Flood conditions in the previous two years have also damaged stocks. This will either be totally closed, or leave a little bit of area open so people can fish. Looking at the numbers, there is a very limited fishery at the mouth. The pike are so high in Alexander Creek, the rest of the spawners are limited. ADF&G could still close this down, if needed. Commercial industry reports daily, particularly in critical areas. Information has changed since this was written.  
Tabled time certain entire proposal

10-5-0

motion to support 335 - 336

Increasing the opportunity to harvest fish further down on the Susitna could compound the problem of low king salmon escapements on East side susitna ies. Decided to withdraw this proposal. This can be looked at again in the future, if needed.

motion to withdraw

15-0-0

motion to accept 337 as amended

Amendment:

“Continue adjusting Deshka River king salmon bag limit by emergency order, however ADF&G shall issue Deshka River emergency orders by February 1 (date suggested by Palmer office ADF&G staff) when based on Deshka River weir data from the previous year. Emergency orders based on in season data may continue to occur during the summer fishery.”

When ADF&G intends to use pre-season data to set limits, public will be notified by February 1. Delete the portion of the proposal that allows a two fish limit, and set limits by EO.

Last four years the king salmon limit on the Deshka has been changed. Public notice has been inadequate (three days prior to the season). This seeks to put the two fish limit into regulation, but populations aren't sufficient for a two king limit. In season data is available approx June 10. February 1 will allow sufficient time for department and public notice. Opposed did not want to put this restriction on ADF&G.

Public has had no notice of increased limits until three days before when decisions were made pre-season.

amendment passed  
13-1-1

motion to support 337 as amended  
13-1-1  
minority opposed to putting this restriction on F&G

motion to support 338  
Last four years the Deshka R has been open 24 hours to fishing by EO. ADF&G is looking at a low run of kings this year. With sport Harvest of 4-6000 kings Deshka is not likely to make lower end of escapement goal. ADFG anticipates a lower bag limit. Increase harvest of fish with a 2 king salmon limit and a 24 hour fishery was approx 1000 fish or less. Prefer a lower bag limit and keep the 24 hour opportunity. This allows people to spread out along the river. This allows opportunity for people who are working to try and harvest.

motion passed  
14-0-1

motion to support 339

When king salmon count past Deshka River Weir exceeds the escapement range midpoint on or before July 10, then downstream of the weir, the Deshka River king salmon season shall be extended through July 31. If there is a harvestable surplus, as measured by the weir, would like to have that opportunity. Not convinced biologically this is sound. According to ADFG it is sound. There is a higher escapement for kings on this system than any other early king salmon system in Cook Inlet.

Subcommittee – some people were opposed to catching red fish, which would be spawning in July. Most of the spawning is above the weir. Getting a few more fish doesn't hurt anything. Only about 10% of the fish caught there after July 15<sup>th</sup> are worth keeping.

motion passed  
8-5-2

motion to withdraw 340 and 341

One changes the season. The other would allow use of treble hooks from Willow to Talkeetna from May 15 to end of king season. Concern of a higher mortality on rainbow trout if treble hooks are used. When this proposal was submitted, the committee didn't have the data. Motion to withdraw these proposals.

motions withdrawn  
15-0-0

Next meeting January 2<sup>nd</sup> MTA building in Palmer.  
Meeting adjourned at 10:00 pm.

RECEIVED

JAN 08 2008

BOARDS

Matanuska Valley AC -Fisheries Subcommittee notes from Monday Dec. 3, 2007 meeting at ADF&G conference room in Palmer. Recorded by Andy Couch

160. 0-4-0 We oppose this proposal because current ADF&G forecasts and protections within the Central District Drift Gillnet Fishery Management Plan are inadequate to meet Northern District sockeye salmon spawning escapement goals as seen in Yentna River sonar sockeye salmon escapement counts. This proposal would remove some of the already inadequate protections within this management plan. Increased management flexibility controlled entirely by the commercial manager often results in missing or barely achieving the escapement goal and little or no surplus fish for harvest by Northern District or inriver users.

161-162. Oppose 0-4-0; We oppose the idea of removing specific language from management plans which was originally put into the plans to provide protections for Northern bound salmon stocks. Since ADF&G has failed to meet the Yentna River sockeye salmon escapement goals 2 out of the past 3 years and since ADF&G has only met the midpoint of the Yentna River sockeye salmon escapement goal once in the past 10 years, specific language to protect Yentna sockeye should be strengthened rather than removed.

164. Support 4-0-0 We support the concept of using specific management language in management plans throughout the entire season.

166. Oppose 0-4-0. We oppose the concept of management to stay under the top end of a spawning escapement goal range without consideration to the impacts on other salmon stocks, other salmon species, and other user groups. Maximizing the harvest of one user group should not come at the expense of salmon escapement needs and viable harvest opportunities for other user groups.

167, 168. Oppose 0-4-0. Maximizing commercial sockeye harvest at the expense of personal use fisheries, sport fisheries, and escapements of other salmon stocks is unacceptable.

169. Tabled

170. Oppose 0-4-0 Maximizing commercial harvests should always be subject to established escapement goals and also to harvest need of other user groups.

171. No Action. We support the concept of having sport language in sport regulations rather than commercial regulations, but don't understand if there would be other unforeseen impacts.

There was consensus with fisheries subcommittee members that we request the Matanuska Valley AC Chairman invite the ADF&G Genetic scientists to a meeting so the committee could ask specific questions about the newly issued Sockeye salmon genetics report.

Sport Fishing

\*\*\*330. Amendment to 1. Reduce Northern District commercial and

RECEIVED TIME JAN. 8. 11:35AM

A/C Comment#

5

Central District commercial king salmon fishery back to pre Board of Fisheries 2005 level, 2. Reduce Sport fishing area for king salmon to an ADF&G marker approximately 1/4 mile upstream from the mouth of Alexander Creek, 3. Establish a 2 king salmon seasonal limit within one mile of the mouth of Alexander Creek. 4. . Amendment passed 5-0. Amended proposal passed 5-0.

139, 331, 332, 333, 334 -- No Action see 330.

#335 Subcommittee voted to withdraw this proposal. 5-0

336 Subcommittee voted to withdraw this proposal 5-0

337. Ammendment passed 4 - 0 Motion passed as ammended 3-1 Amend to continue adjusting Deshka River king salmon bag limit by emergency order, however ADF&G shall issue Deshka River emergency orders by February 1 (date suggested by Palmer office ADF&G staff) when based on Deshka River weir data from the previous year. Emergency orders based on inseason data may continue to occur during the summer fishery.

At a November 2007 Matanuska Valley AC fisheries subcommittee meeting, ADF&G staff informed the subcommittee that the most recent Deshka River weir data shows permanently adjusting the bag limit to 2 king salmon per day likely could result in failure to meet the Deshka River king salmon goal over the next few years. Matanuska Valley AC is supporting informing the public as early as possible, whenever the fishery will be expanded or reduced.

338 - Supported 4-1

339. Opposed 1-3

340. Opposed 1-3

341. Opposed 1-2-1

END OF PROPOSALS CONSIDERED AT DEC. 19, 2007 MATANUSKA VALLEY AC MEETING.

342. Supported 4-0. If there are enough coho salmon to expand the Northern District set net fishery out of the restrictions in the Coho salmon conservation plan as was done by the Board of Fisheries at the 2005 meeting, then there should also be enough coho salmon to provide a 3 coho salmon sport limit as was the regulation before implementation of the coho salmon conservation plan. If there are not enough surplus harvestable coho salmon for both user groups, then both user groups should go back to the restrictions prior to the 2005 Board of Fisheries meeting. We would also like ADF&G to do a bag limit analysis.

343. Opposed 1-3.

344. Oppose 0-4.

345. Opposed 0-4

346. Proposal mistakenly submitted -- it had not passed committee. Committee votes to withdraw. 4-0.
347. Opposed 0-4.
348. Supported 4-0. Our own committee proposal about Eklutna king salmon.
349. Opposed 1-1-2.
350. Supported 3-1. Would reduce Big Lake burbot limit to 2 fish and establish a closed season when no retention would be allowed.
351. Supported 4-0. Would reduce Big Lake burbot limit to 2 fish -- season would remain open entire year.
352. Supported 4-0. Expanding pike regulation lakes.
353. Supported 4-0. Expanding Shell lake pike fishery.
354. Opposed. 0-4. Expansion of pike regulations -- subcommittee felt this proposal was too liberal.
355. Allow Bait and no bag limit for pike on Doshka, Yentna, and Susitna Rivers Nov. 1- April 15. Amended to hook size of 6/0 for singles and 1/0 for trebles. Amendment passed 4-0. Proposal passed 4-0.
356. Opposed 0-4. Too liberal. Would establish personal use salmon fisheries.
357. Opposed 0-4. Establish sport limit for hooligan. Not needed in Susitna River -- especially if we have enough fish for an inriver commercial fishery.
358. Opposed 0-4. Would establish too liberal of personal use salmon gill net fishery near Beluga.

MOUNT YENLO AC MEETING MINUTES FROM JANUARY 12, 2008  
UCI proposals agenda

RECEIVED  
JAN 16 2008  
BOARDS

The meeting was held at the Skwentna Roadhouse and was called to order at 11:00am. Members present were Bonnie Childs, Steve Childs, Barry Stanley, John Faeo, Tom Payton, and Bob Meisner by telephone. Mark Miller had an excused absence. A quorum was had. Vice-chair, Tom Payton chaired the meeting due to the resignation of Dave Mc Hoes.

James Ivey and Tom Brion, both from Skwentna, expressed interest to become members and by consent of the entire committee, both took seats available.

Fishery Biologist Dave Rutz Started out with an overview of the coming season projections and areas in the Susitna drainage that are of interest to the committee.

The committee voted unanimously on each proposal it took up.

Voting results of the committee on the proposals it looked at;

- |                      |                            |

| 172 thru 174, failed |                            |

STATEMENT TO BOARD

The Mount Yenlo Advisory Committee wishes to convey to the Board of Fish that it believes that there has been, and may continue to be a major over-exploitation of the Northern District/Susitna drainage salmon stocks of all 5 types of salmon by Central District nets. There are many unknowns in this equation, but it is a fact that fish are being intercepted by the nets. We believe that there is a real concern for the future of our fish stocks in the Northern streams such as the Susitna and Yentna that thousands of our Alaskan residents have relied on for many years for our way of life, be it economic, consumptive, or as recreational family use.

We believe that this system can have larger returns, and not the smaller returns as has become normal lately.

Therefore, based on our members years of personal study and professional experience in the fisheries in this area, Mount Yenlo believes that liberalizing, or extending seasons, gear or areas for any commercial net fisheries at this time is unwise and additionally believes these commercial fisheries should be further restricted from exploiting these stocks to allow them to return to more abundant numbers.

Passage of any one of these proposals could place discreet stocks or runs in danger.

The Committee has reflected these concerns in our voting by failing any proposals that will liberalize net fisheries in salt water.

The Committee has also failed to support all proposals to liberalize in-river uses in the Susitna/Yentna system except No. 342, which would just return Coho bag limits to prior years.

It is the Board's duty to protect these stocks and their common uses, when that is possible. It is also the Board's duty to restore these stocks now.

The term "over-escapement" has never been applied in the Northern District rivers.

It is the time to try something different...if you follow no other rules or regulations or laws...follow the rule of CONSERVATION.

*Tom Payton, Chair*

Kenai / Soldotna Fish Game Advisory Committee comments on Upper Cook Inlet Board of Fisheries proposals

| Proposal number | Action requested  | Proposed by ADF&G                    | Number | AC Vote | AC Comments                                    |
|-----------------|---|--------------------------------------|--------|---------|--|
| 73              | Amend Central District Herring Management Plan  |                                      |        | 12/6/0  |  |
| 75              | Prohibit use of spotter planes within one hour of commercial open periods   | Daniel Hakkinen                      |        | 2/6/4   | Quarter of the fleet catches 1/2 the fish      |
| 76              | Modify drift gillnet area for Kaslof Section  | Owen Geer                            |        | 1/9/1   |  |
| 77              | Redefine demarcation of Kenai and Kaslof sections   | Kenai River Sportfishing Association |        | 0/8/4   |  |
| 78              | Reopen the Southside of Chinikina Bay to gillnetting  | Mike Carpenter                       |        | 0/5/5   |  |
| 87              | Clarify transition between sockeye management and coho management   | Kenai River Sportfishing Association |        | 4/9/1   |  |
| 116             | Add personal use, sport and guided sport user to the priority for management purposes in Upper Cook Inlet salmon based on management umbrella | Cook Inlet Sportfishing Caucus       |        | 0/13/0  |  |
| 117             | Amend umbrella salmon manage plan to clarify escapement goals based on wild fish  | Kenai River Sportfishing Association |        | 3/8/1   |  |
| 119             | Identify Sustana River and Fish Creek as stocks with a yield concern under the Sustainable Salmon Policy and create conservation              | Bruce Knowles                        |        | 6/12/1  |  |
| 120             | Designate Cook Inlet chum salmon as a Stock of Concern  | Kenai River Sportfishing Association |        | 0/8/0   | No Stock of concern                            |
| 125             | Revise UCI area management plans to address quality, sustainability and revitalize industry   | Brent Western                        |        | 0/12/0  |  |
| 128             | Clarify BOF intention to manage the fisheries in season to meet the escapement goals  | United Cook Inlet Drift Assoc        |        |         | no action                                      |
| 129             | Clarify the BOF intent that achieving escapement goals supersedes specific time and area provisions in other UCI Salmon Management            | United Cook Inlet Drift Assoc        | 8      | 8/20    |  |
| 132             | Implement priorities among salmon management plan for Upper Cook Inlet  | Kenai River Sportfishing Association |        | 0/9/0   |  |
| 153             | Amend Cook Inlet Pink Salmon Management Plan  | ADF&G                                | 10     | 10/0/0  |  |
| 154             | Allow earlier and more fishing periods for pink salmon harvest and delete permit requirements   | Dyer VanDevere                       | 10     | 9/0/1   | has to start another card                      |
| 155             | Add set and drift gillnet opportunities to harvest pink salmon  | South K Beach Independent Fishermans | 9      | 6/2/1   |  |
| 164             | Amend regulation to clarify August fishing periods in the Central District  | Kenai River Sportfishing Association | 8      | 0/8/0   |  |
| 165             | Reinstates sunset provision for directed Cook Inlet west side drift gillnet fishery   | Kenai River Sportfishing Association | 8      | 3/5/6   |  |
| 169             | Increase OEG based on updated data in the Kaslof and modify fishing periods   | Kenai River Sportfishing Association |        | 5/8/0   |  |
| 170             | Open South Kenai Beach district whenever necessary to harvest in the Kaslof terminal area   | South K Beach Independent Fishermans |        | 12/0/1  |  |
| 197             | Establish Kenai River late run sockeye escapement goal range of 400,000 - 700,000   | Wesley Humbyrd                       |        | 7/2/0   | Current confusing, manage to 1 biological goal |
| 202             | Amend windows provisions for Kenai River Late-Run Sockeye Plan  | Kenai River Sportfishing Association | 8      | 2/6/0   | restricted adds 12 more hours of closure       |
| 203             | Limit commercial fishing prior to availability of in-season run strength estimate   | Alaska Sportfishing Association      | 8      | 2/6/0   |  |

Kenai / Soldotna Fish Game Advisory Committee comments on Upper Cook Inlet Board of Fisheries proposals

| Date   | Proposal number | Action requested   | Proposed by                             | Number | AC Vote | AC Comments  |
|--------|-----------------|--|---|--------|---------|--|
| 14-Dec | 206             | Amend Kenai River Late-Run Sockeye Salmon plan   | ADF&G                                   | 9      | 09/0    | amended to below and within 28/1   |
| 14-Dec | 207             | Allow the commissioner to increase the bag limit up to 12 sockeye salmon if abundance exceeds 4,000,000 salmon                   | Alaska Sportfishing Association         |        | 09/0    | No Action  |
| 14-Dec | 208             | Allow additional harvest opportunity when in-river sockeye abundance warrants  | Kenai River Sportfishing Association    | 10     | 5/50    | highly allocative  |
| 10-Oct | 211             | Prohibit dipnetting on the Kenai River until BEG is met  | John McCombs                            | 12     | 0/120   | unfair allocation  |
| 10-Oct | 212             | Prohibit personal use dipnet fishery on Kenai River until escapement goals met   | Steve Varnek                            | 11     | 0/120   | unfair allocation  |
| 10-Oct | 213             | Link personal use dipnet openings to escapement numbers  | Teague Varnek                           | 11     | 0/100   | unfair allocation  |
| 10-Oct | 214             | Extend dipnet season on Kenai River  | Patricia Shearer & Sheila Calona        | 11     | 05/2    | Commissioner already has this authority  |
| 10-Oct | 215             | Increase harvest opportunity in personal use fishery in Kenai and Kaslof rivers  | Kenai River Sportfishing Association    | 11     | 1/100   | political waste  |
| 10-Oct | 216             | Increase Kaslof River personal use household limit   | Robert L. Bell, Jr.                     | 11     | 1/100   | Status quo is good   |
| 10-Oct | 217             | Reduce personal use fishery limit to 5 salmon per person, 25 per household   | Tom O'Brien                             | 11     | 10/100  | Status quo is good   |
| 10-Oct | 218             | Lower annual limits for personal use salmon harvest to 20 for head of household and 5 for each dependent and no more than 50% of | Richard Thompson                        | 11     | 0/110   | Status quo is good   |
| 10-Oct | 219             | Lower annual limits for personal use salmon harvest to 15 for head of household and 5 for each dependent                         | Richard Thompson                        | 11     | 1/100   | Status quo is good   |
| 10-Oct | 220             | Prohibit personal use dipnets with mesh size over 2 1/2 inches   | Steve Varnek                            | 11     | 2/90    | Against dip gill netting on and off the river  |
| 10-Oct | 221             | Implement motor type restriction for dip net fishing from vessel   | ADF&G                                   | 11     | 10/100  | Amended to beginning in 2008, like the idea of another motor on boat. Might be a problem |
| 10-Oct | 222             | Restrict 2-stroke motor boat use in personal use fishery   | Kenai Area Fisherman's Coalition        | 11     | 0/100   | Basically opposite of 221, might elevate hydrocarbons in river                           |
| 10-Oct | 223             | Require motorized boats utilizing the personal use fishery to be anchored or without power while fishing                         | Kenai Area Fisherman's Coalition        | 11     | 0/100   | Opposite of 221  |
| 10-Oct | 224             | Allow rod and reel in personal use fishery/identify consumptive users as a person fishing for winter supply                      | Bruce Knowles                           | 11     | 0/110   | mixed gear, becomes hazardous  |
| 21-Oct | 225             | Increase days allowed to retain naturally-produced king salmon in the Kaslof River   | Kenai River Professional Guide Assoc.   | 9      | 8/01    | no stock status reports  |
| 21-Oct | 226             | Increase bag limit for hatchery stock king salmon on Kaslof River  | Kaslof River Land Owners Association    | 9      | 0/80    | too much crowding  |
| 21-Oct | 227             | Prohibit fishing after retaining a king salmon   | Friends of Kaslof & Kaslof River Assoc. | 9      | 0/81    |  |
| 21-Oct | 228             | Designate portion of Kaslof River as a king salmon spawning sanctuary  | Kenai River Sportfishing Association    | 9      | 2/43    |  |
| 21-Oct | 229             | Prohibit power boats on Kaslof River   | David Carpenter                         | 9      | 0/90    | poorly written   |
| 21-Oct | 230             | Restrict motorized use on portion of Kaslof River  | Friends of Kaslof & Kaslof River Assoc. | 8      | 1/70    | Department against   |

Kenai / Soldotna Fish Game Advisory Committee comments on Upper Cook Inlet Board of Fisheries proposals

| Proposal number | Action requested   | Proposed by                          | Number | AC Vote | AC Comments  |
|-----------------|--|--------------------------------------|--------|---------|--|
| 231             | Prohibit fishing from boat July 1-Aug. 15 in upper portion of Kaslof River.  | Robert L. Ball, Jr.                  | 8      | 7/1     | Like the idea  |
| 232             | Allow motorized use during king salmon season on the Kaslof River  | David Richards                       | 8      | 0/8/0   |  |
| 233             | Allow anchoring of boats in portion of Kaslof River  | Michael Craig                        | 8      | 0/8/0   |  |
| 234             | Increase Kaslof River sockeye bag limit  | Robert L. Ball, Jr.                  | 8      | 0/8/0   |  |
| 235             | Open Chickaboon River to king salmon fishing   | Vernon Porter                        | 8      | 0/8/0   |  |
| 236             | Modify rainbow trout bag limits for Kenai River drainage lakes and ponds   | Spencer Devito                       | 8      | 0/8/0   |  |
| 237             | Modify rainbow trout bag limits for Kenai River drainage lakes and ponds   | Dick Dykenia                         | 8      | 2/6/0   | Same proposal as 236   |
| 238             | Expand rainbow trout spawning closure from the outlet of Skiak Lake to the Upper Killey River to include Dolly Varden    | Kenai River Professional Guide Assoc | 8      | 7/1/0   | Amended to Moose River, amended to no fishing from 5/1 to 6/10 |
| 239             | Reduce spawning closure season for rainbow trout   | Andy Szczesny                        | 8      | 0/8/0   | Department against   |
| 240             | Prohibit all sport fishing during the rainbow trout spawning closure   | Ted Wellman                          | 8      | 0/8/0   |  |
| 241             | Prohibit removing rainbow trout from the water during spawning closure   | ADF&G                                | 8      | 8/8/0   |  |
| 242             | Prohibit removing rainbow trout or Dolly Varden from the water in catch and release fishing                              | Cooper Landing AC                    | 8      | 1/6/1   |  |
| 243             | Require single, barbless hooks in Kenai River upstream of Lower Killey River from August 21 - June 10                    | George Krumm                         | 8      | 0/7/1   |  |
| 244             | Require barbless hooks for rainbow trout or Dolly Varden in the Kenai River  | Cooper Landing AC                    | 8      | 1/7/0   |  |
| 245             | Restrict gear for rainbow trout and Dolly Varden in portion of Kenai River   | Ted Wellman                          | 8      | 0/8/0   |  |
| 246             | No fishing from anchored vessel in the swan sanctuary area, Skiak Lake /Kenai River from June 15 - December 31           | John Sanderson                       | 8      | 3/4/1   |  |
| 247             | Eliminate size restriction on dolly varden for Kenai River   | Philip Brower                        | 10     | 0/10/0  | trophy fishery, protect fish, keep it the way it is            |
| 248             | Increase the bag limit for Arctic Char in the Cooper Lake to 5 per day / 5 in possession only one over 20 inch or longer | Kenai Area Fisherman's Coalition     | 8      | 0/8/0   |  |
| 249             | Decrease the daily bag limit for lake trout in Hidden Lake   | ADF&G                                | 8      | 7/0/1   |  |
| 250             | Allow up to five lines to fish for northern pike fishing in Arc Lake and Scout Lake                                      | ADF&G                                | 8      | 8/0/0   |  |
| 251             | Allow up to five lines to fish for northern pike fishing in Stormy Lake  | Brian Copenhaver                     | 8      | 8/0/0   |  |
| 252             | Prohibit releasing any northern pike while fishing in the Kenai Peninsula  | Natalee Vanderford                   | 8      | 8/0/0   |  |
| 253             | Close fishing from 100 yards above Farry Cable to 25 yards below cable on Kenai River                                    | Charles Owen                         | 8      | 0/8/0   |  |
| 254             | Increase size of designated youth fishing area on the Kenai River  | Jack Storer                          | 8      | 0/8/0   |  |

Kenai / Soldotna Fish Game Advisory Committee comments on Upper Cook Inlet Board of Fisheries proposals

| Proposal number | Action requested   | Proposed by                          | Number | AC Vote | AC Comments        |
|-----------------|--|--------------------------------------|--------|---------|--------------------|
| 255             | Increase size and bag limits for jack kings in Kenai River   | Kenai River Sportfishing Association | 9      | 09/00   | Staff opposed      |
| 256             | Delete bag limit for king salmon under 28 inches on Kenai River  | James Karl Johnson                   | 9      |         | No Action          |
| 257             | Increase size and bag limits for jack kings in Kenai River   | Robert Estes                         | 9      |         | No Action          |
| 258             | Increase the jack king salmon size limit from 20" to 25" in Cook Inlet freshwaters                                 | Tim Hiner, David Richards            | 9      |         | No Action          |
| 259             | Modify bag limit to allow retention of hatchery stock king salmon in the Kenai River drainage                      | Robert L. Ball, Jr.                  | 9      | 09/00   |                    |
| 260             | Modify bag limit to allow retention of hatchery stock king salmon in the Kenai River drainage                      | Nathan Carr                          | 9      |         | No Action          |
| 261             | Eliminate Kenai River early-run king salmon slot limit   | Andy Szczesny                        | 9      | 09/00   | Department opposed |
| 262             | Eliminate Kenai River early-run king salmon slot limit   | Joshua Caleb Johnson                 | 9      |         | No Action          |
| 263             | Amend the slot limit season for early-run king salmon on the Kenai River   | Kenai Area Fisherman's Coalition     | 9      | 3/60    | Department opposed |
| 264             | Extend early-run king salmon slot limit below the Soldotna Bridge through July 14                                  | Francis Estailia                     | 9      |         | No Action          |
| 265             | Resist altering harvested king salmon to allow for length assessment   | ADF&G                                | 9      | 9/00    | Staff opposed      |
| 266             | Restrict use of bait for early-run kings on portion of Kenai River   | Kenai River Professional Guide Assoc | 9      | 17/71   | Staff opposed      |
| 267             | Allow use of bait in the early run Kenai River king salmon fishery starting May 1 or June 1.                       | Mal Erickson                         | 9      | 1/80    | Staff opposed      |
| 268             | Extend Fanny River, Siskok Creek, and Lower Killey River sanctuary closures through July 31 and expand Killey area | Kenai Area Fisherman's Coalition     | 9      | 3/60    | Staff opposed      |
| 269             | Extend Fanny River, Siskok Creek, and Lower Killey River sanctuary closures through July 31 and expand Killey area | Andy Szczesny                        | 9      | 2/61    | Staff opposed      |
| 270             | Extend Kenai River king salmon season through August 7   | Ruth Marie Johnson                   | 9      |         | No Action          |
| 271             | Extend late-run king salmon sport fishing season through August 10   | Mevin Forsyth Jr.                    | 9      | 08/01   | Staff opposed      |
| 272             | Increase escapement goal for Kenai River late-run king salmon  | Mevin Forsyth Jr.                    | 9      | 09/00   | Staff no action    |
| 273             | Delete portions of Kenai River Late-Run King Salmon plan   | John Higgins                         | 9      | 09/00   | Staff no action    |
| 274             | Delete section (e) of Kenai River late-run king salmon management plan   | Central Peninsula AC                 | 9      | 08/01   | Staff neutral      |
| 275             | Limit non-resident permits for king salmon on Kenai River  | Ted Wellman                          | 9      | 17/71   | Staff opposed      |
| 276             | Establish annual limits for salmon fishing by non-resident anglers   | Ted Wellman                          | 9      | 3/51    | Staff neutral      |
| 277             | Prohibit non-residents from exporting more than 125 pounds of fish   | John McCombs                         | 9      | 3/62    |                    |

Kenai / Soldotna Fish Game Advisory Committee comments on Upper Cook Inlet Board of Fisheries proposals

| Date   | Proposal number | Action requested  | Proposed by                          | Number | AC Vote | AC Comments   |
|--------|-----------------|---|--------------------------------------|--------|---------|---|
| 20-Nov | 278             | Allow retention of sockeye salmon unintentionally hooked in the Kenai, Kaslof, and Russian Rivers | Dwight Kiamer                        | 10     | 3/7/0   | S/Doesn't increase harvest, reduces violations, some modification, limit 6 and hook size. O/other things to consider vague, people intentionally violate limits, public will abuse regulations, unethical |
| 20-Nov | 279             | Increase bag limit for coho salmon in Kenai Peninsula freshwater streams                          | Kenai River Professional Guide Assoc | 10     | 5/5/0   | S/Healthy return, no coho concern, use EO for closure. O/Could create a concern   |
| 20-Nov | 280             | Increase coho bag limit in Cook Inlet area rivers   | David Richards                       | 10     | 3/6/1   | based on 279  |
| 20-Nov | 281             | Increase bag limit for coho salmon in the Kenai River   | Metvin Forsyth Jr.                   | 10     | N/A     |   |
| 20-Nov | 282             | Extend the coho salmon fishing season through November on Lower Kenai River and Skillek Lake      | Steve McClure                        | 10     | 100/0   | S/provides opportunity  |
| 20-Nov | 283             | Add one drift boat only day on the Kenai River  | Warren Crawford                      | 10     | 3/6/1   | S/Members will not change, addresses erosion. O/no one benefits, makes other motor days more crowded, allocative between users  |
| 20-Nov | 284             | Add one drift boat only day on the Kenai River  | Todd Moore                           | 10     | 0/7/5   |   |
| 20-Nov | 285             | Add one drift boat only day on the Kenai River  | Kenai Area Fisherman's Coalition     | 10     | 6/4/0   | Brought Back to table 6/0/0, too expensive, habitat issues 5/4/0  |
| 20-Nov | 286             | Add one additional non-guided drift only day on the Kenai River                                   | Jim Richardson                       | 10     | 0/8/2   |   |
| 20-Nov | 287             | Add one drift boat only day on the Kenai River  | Roland Maw                           | 10     | 9/1/0   | S/Tuesday makes 2 days rest for river. O/ Its always going to be crowded, not a valid reason.   |
| 20-Nov | 288             | Make Sunday, Wednesday, and Friday drift-only days on Kenai River                                 | John Sanderson                       | 10     | 3/6/1   |   |
| 20-Nov | 289             | Phase-in additional drift boats only days on Kenai River  | Richard Hahn                         | 10     | 3/6/1   |   |
| 20-Nov | 290             | Prohibit fishing from motorized vessel in Kenai River   | John McCombs                         | 10     | 0/9/1   |   |
| 20-Nov | 291             | Require 4-stroke or direct fuel injection motors on the Kenai River                               | Richard Hahn                         | 11     | 1/7/3   |   |
| 20-Nov | 292             | Require 4-stroke or direct fuel injection motors on the Kenai River                               | Andy Szczesny                        | 11     | 7/3/1   |   |
| 20-Nov | 293             | Require 4-stroke or direct fuel injection motors on the Kenai River                               | Mel Erickson                         | 11     | 8/1/2   |   |
| 20-Nov | 294             | Regulate motorized use for fishing on the Kenai River to reduce hydrocarbon pollution             | City of Kenai, et al                 | 11     | 2/7/2   |   |
| 20-Nov | 295             | Reduce fishing hours or restrict motorized use to reduce hydrocarbon discharge into Kenai River   | Jeff Stephens                        | 11     | 0/1/0/1 |   |
| 20-Nov | 296             | Restrict outboard motors to 35 hp or less on the Kenai River.                                     | Matthew Hall                         | 11     | 11/0/0  |   |

Kenai / Soldotna Fish Game Advisory Committee comments on Upper Cook Inlet Board of Fisheries proposals

| Date   | Proposal number | Action requested  | Proposed by                          | Number | AC Vote | AC Comments  |
|--------|-----------------|---|--------------------------------------|--------|---------|--|
| 20-Nov | 297             | Prohibit king salmon fishing from boats during a 48 hour period on lower Kenai River                                      | John Egan                            | 11     | 0/11/0  | 0/Don't know when the fish will move into the river                          |
| 20-Nov | 298             | Prohibit non-residents from fishing from a vessel unless accompanied by a relative between 6pm and 6am on the Kenai River | Rod Berg, Randy Berg                 | 11     | 2/9/0   | S/stops illegal guide activity. O/not enforceable, doesn't solve the problem |
| 20-Nov | 299             | Open Kenai River below Soldotna Bridge to fishing from boats during king salmon season                                    | James Karl Johnson                   | 11     | 0/10/1  |  |
| 20-Nov | 300             | Require course for powerboat operation on Kenai River   | James Karl Johnson                   | 11     | 1/6/4   | S/M violation high percent of general public. O/age limit is an issue        |
| 20-Nov | 301             | Restrict use of motorized vessel for fishing on the Upper Kenai River near Kenai Lake                                     | Cooper Landing AC                    | 11     | 0/11/0  | S/Addresses erosion issues.  |
| 28-Nov | 302             | Institute limited entry program for guides on Kenai and Kaslof rivers   | Ted Wellman                          | 11     | 2/1/3   | Board doesn't have authority, concerned about over crowding                  |
| 28-Nov | 303             | Modify existing Kenai River guide hours from 6am - 6pm, to 7am - 7pm.   | Warren Crawford                      | 11     | 0/8/3   | no justification   |
| 28-Nov | 304             | Modify existing Kenai River guide hours from 6am - 6pm, to 7am - 7pm.   | Kenai Area Fisherman's Coalition     | 11     | 0/10/1  | based on 303   |
| 28-Nov | 305             | Modify existing Kenai River guide hours from 6am - 6pm, to 8am - 8pm.   | L. R. Anderson                       | 11     | 0/10/1  | based on 303   |
| 28-Nov | 306             | Prohibit guide boats with clients in fishing holes 10 minutes prior to opening times.                                     | Warren Crawford                      | 11     | 0/11/0  | component in guide academy, not enforceable                                  |
| 28-Nov | 307             | Prohibit guides with clients from being on the river prior to 1/2 hour before start time                                  | Kenai Area Fisherman's Coalition     | 11     | 0/10/1  |  |
| 28-Nov | 308             | Separate the guided and unguided sport fishers in the lower Kenai river by day and time                                   | Dwight Kramer                        | 11     | 0/10/1  | allocative   |
| 28-Nov | 309             | Prohibit Kenai River guiding on Thursdays in June and July  | L. R. Anderson                       | 11     | 0/11/0  | based on 285   |
| 28-Nov | 310             | Prohibit guides from fishing on Kenai River on Sundays  | L. R. Anderson                       | 11     | 1/9/1   | allocative   |
| 28-Nov | 311             | Prohibit guides from fishing on Kenai River on Sundays  | Todd Moore                           | 11     | 0/10/1  |  |
| 28-Nov | 312             | Restrict licensed guides while fishing during non-guide hours on Kenai River  | Kenai Area Fisherman's Coalition     | 11     | 0/11/0  | difficult to enforce   |
| 28-Nov | 313             | Limit guides on the Kenai River to only one client or group of clients per day during July                                | Dwight Kramer                        | 11     | 4/5/2   | increases boats, hydrocarbon issues, what constitutes group                  |
| 28-Nov | 314             | Restrict Kenai River guiding to one trip per day  | L. R. Anderson                       | 11     | 3/5/2   |  |
| 28-Nov | 315             | Restrict Kenai River and Kaslof River guides to one trip per day on either river  | Robert L. Ball, Jr.                  | 11     | 3/9/0   | considered zoning  |
| 28-Nov | 316             | Limit guides to only one client or group of clients per day for Upper Cook Inlet Rivers                                   | Dwight Kramer                        | 11     | 2/9/0   |  |
| 28-Nov | 317             | Require guides to register for either the Kenai River or the Kaslof River   | Robert L. Ball, Jr.                  | 11     | 0/10/1  | too restrictive, prevents people from fishing other rivers                   |
| 28-Nov | 318             | Restrict same day guiding on both Kenai and Kaslof rivers   | Kaslof River Land Owners Association | 11     | 7/2/2   |  |
| 28-Nov | 319             | Prohibit Kaslof River guided fishing when the Kenai River is closed to guided fishing.                                    | Robert L. Ball, Jr.                  | 11     | 2/9/0   |  |
| 28-Nov | 320             | Prohibit Kaslof River guided fishing on Mondays   | Kaslof River Land Owners Association | 11     | 2/9/0   | allocative   |

Kenai / Saldanha Fish Game Advisory Committee comments on Upper Cook Inlet Board of Fisheries proposals

| Date   | Proposal number | Action requested   | Proposed by    | Number | AC Vote | AC Comments  |
|--------|-----------------|--|----------------|--------|---------|--|
| 28-Nov | 321             | Allow Kenai River guides to operate on Sundays in May and June, and no hour restrictions in May            | Brian Waters   | 11     | 16/4    | like how it is working now                                       |
| 28-Nov | 322             | Repeat the guide boat prohibition on Mondays in the Kenai River  | David Richards | 11     | 7/3/1   | Amend to Mondays 6/4/1   |
| 28-Nov | 323             | Allow guides to fish from drift boats on the Kenai River in July   | David Richards | 11     | 0/11/0  | no guides on Mondays   |
| 28-Nov | 324             | Allow a guide boat on the Kenai River to carry six persons instead of five during the month of July        | David Richards | 11     | 1/9/1   |  |
| 28-Nov | 325             | Designate one day per week on the Kenai River late run to guided anglers only                              | Mal Erickson   | 11     | 2/8/1   | less crowding  |
| 28-Nov | 326             | Allow guided fishing 7 days per week with each individual guide allowed 5 days per week on the Kenai River | Mal Erickson   | 11     | 1/9/1   | nonenforceable, great with a cap, limited entry, spreads harvest |
| 28-Nov | 327             | Eliminate Sunday closure for guides on the Kenai River   | David Richards | 11     | 1/9/1   | numbers are stable, conservation, biological concern             |
| 28-Nov | 328             | Modify regulation prohibiting fishing by sport fishing guides when clients are present on the Kenai River  | ADF&G          | 11     | 11/0/0  |  |
| 28-Nov | 329             | Align vessel registration regulations with DNR requirements that allow for un-registering guide vessels    | ADF&G          | 11     | 11/0/0  | house cleaning   |
| 14-Dec | 352             | Modify pike fishing for selected Upper Cook Inlet streams  | ADF&G          | 8      | 8/0/0   |  |
| 14-Dec | 355             | Liberalize methods and means for northern pike in fishing Dashedka, Yenta, and Sustine drainages           | Bruce Taylor   | 8      | 5/2/1   |  |
