Revision to: Atlas ____ Catalog ____ Both N/A	Ed Weiss — 1/28/94
Revision Code:	N/A — Drafted — Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Dolly Varden	10/8/93	✓	✓		

Provide any clarifying information, including number of fish observed, location of fish survey data, etc. Attach a copy of the fish survey data, if available. Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls.

Comments:

These two tributaries provide spawning + rearing habitat for Dolly Varden. 1993 was a very dry year. It is probable that coho salmon rear in these waters in normal or wet years. Rearing Dolly Varden were trapped in the west fork in the railroad switch yard above 23rd Ave. The east tributary originates from a spring beneath the railroad tracks just downstream of 18th Ave. The west fork intersects Pullen Creek at 18th Ave. (Note this information is provided to document fish presence not inclusion in catalog/atlas)

Name of Observer (please print) Randy Ericksen

Date: 10-15-93 Signature: Randy Ericksen

Address: ADF&G - Sport Fish Division
P.O. Box 330, Haines Ak 99827

Signature of Area Biologist: Randy Ericksen
