IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: This stream is referred to as Station Bay, West Arm, number 302-11.04 in the Division of Commercial Fisheries Stream Survey log book.

This is an important salmon stream that had been overlooked until 1983 because it doesn't appear on the 1:250,000 topo map.

The last survey was on 8/11/98 Add Ps to new stream

REMARKS: Anadromous Fish Stream Nominations. All are in the oil spill area on Unalaska Island. Three are pretty minor, but one (Station Bay West Arm) is a nice looking stream and at times gets a lot of fish.
