Name of Waterbody (if known): Areskett Point #2

Location:

Anadromous Waters Catalog Volume and Number S.E. AK

USGS 1:63,360 Quadrangle Petersburg A-4 (6)

or 1:250,000 (if 1:63,360 not available)

#~~103~~ 103-90-10010

Species	Date(s) Observed	Stage(s) (Spawning, Rearing, Migration)
PS	6/18/85	spawning use indicated

Comments: Please provide any clarifying information. Also, please include a map of the area identifying the stream reach. This can be a copy of the map from the Anadromous Waters Atlas.

Adult pink salmon bones were observed on the right upper bank beyond the intertidal area, indicating spawning use by PS. About 100 m of stream with usable spawning area is present before a small bedrock falls is encountered. The bedrock falls is a probable barrier to PS and CS.
