Valdez Fish & Game AC
Statewide Shellfish Oct 27, 2011 mtg

Proposal #358 - Oppose

Valdez F&G AC believes that this is being regulated and monitored by the biologists for the area and it should continue to be regulated by them.

Vote: 0 Support - 5 Oppose - 1 Abstain

Proposal #359 - Oppose

Valdez F&G AC believes that this is being regulated and monitored by the biologists for the area and it should continue to be regulated by them.

Vote: 0 Support - 5 Oppose - 1 Abstain

Proposal #360 - Oppose

Valdez F&G AC believes that this is being regulated and monitored by the biologists for the area and it should continue to be regulated by them.

Vote: 0 Support - 5 Oppose - 1 Abstain

Proposal #361 - Oppose

Valdez F&G AC believes that this is being regulated and monitored by the biologists for the area and it should continue to be regulated by them.

Vote: 0 Support - 5 Oppose - 1 Abstain

Proposal #362 - Oppose

Valdez F&G AC believes that this is being regulated and monitored by the biologists for the area and it should continue to be regulated by them.

Vote: 0 Support - 5 Oppose - 1 Abstain

Proposal #363 - Oppose

Valdez F&G AC believes that this is being regulated and monitored by the biologists for the area and it should continue to be regulated by them.

Vote: 0 Support - 4 Oppose - 2 Abstain

Proposal #365 - Oppose

Valdez F&G AC believes that this is being regulated and monitored by the biologists for the area and it should continue to be regulated by them.

Vote: 0 Support - 4 Oppose - 2 Abstain

Proposal #367 - Support

Valdez F&G AC supports this proposal, although clarification is needed for defining the personal use fishery for shrimp.

Vote: 6 Support - 0 Oppose

Proposal #374 - Support

Valdez F&G AC supports this proposal, but only after clarification was given by state trooper Tony Beck. We believe the regulation needs to be re-written more clearly.

Vote: 3 Support - 2 Oppose

**Seward Fish & Game Advisory Committee Meeting
Minutes of November 10, 2011
City of Seward Council Chambers**

RECEIVED

NOV 10 2011

**BOARDS
ANCHORAGE**

Meeting called to order at 7:00 pm by Chairman McCracken

Members Present: Jim McCracken, Robin Collman, Dianne Dubuc, WC Casey, Bob White, Doug McRae, Arne Hatch, John Flood, Jim Hubbard, , Mark Clemens, Jim Herbert
Quorum present [8 required, 11 present].

*emailed to Scott Shannon
11-16-11*

Members Absent Excused: Corey Hetrick, Ezra Campbell, and Trent Foldager

Members Absent Unexcused: Chris Bolton, Dr. Matt Hall, and Carl Locke

*Attn:
Shannon
BOF SW Shellfish
p. 6-7
prop 371*

Public Present: Tim McDonald, Jeanette Hanneman, Tom Prochazka, John French, Tom Buchanan

ADF&G Staff: Dan Bosch

Approval of Agenda: approved with addition of comments by McDonald

Approval of Minutes: minutes of the previous two meetings were approved with corrections provided by White and McCracken for the 10/20/2011 meeting. Final versions to be sent to Sherry Wright.

Correspondence/Communications: Dubuc reported on participation in a Geographic Strategic Resource [GSR] meeting earlier in the day to identify locations of special interest between Cape Puget and Nuka Point that would need protection in the event of an oil spill or other hazardous material event. Twenty key locations were identified. The work is sponsored by PWS Citizen's Advisory Committee.

White said the Flood Board is working with the Kachemak Bay Land Trust to use "in lieu of money" to purchase wetlands in the Salmon Creek – Clear Creek area. The goal is to protect habitat and provide a buffer for flooding. Other parcels would be purchased with other funds for gravel extraction and as a way to dredge out the river channel. He also said two new 17 foot wide culverts are installed in Salmon Creek near Nash road with funds from the Watershed Forum. This will make life easier for adult and juvenile salmon and do a better job of moving large volumes of water through the area.

Citizens Comments – no one wished to speak at this time.

Page 1 of 8

Seward Fish & Game Advisory Committee Meeting
Minutes of November 10, 2011
City of Seward Council Chambers

New Business – The majority of the meeting was dedicated to the deliberation of PWS fish proposals to be acted on by the Board of Fish in March 2012 and Statewide Game proposals to be acted on January 2012. A summary of the comments by advisory members pertaining to proposals considered follow along with the vote of AC members present. The vote format is for-against-abstain. The maker and the second to the motion to consider are noted. There were no members of the public who wished to comment on any proposal. Chairman McCracken did not vote on the proposals and focused on running the deliberations.

Authorization of travel to Board meetings:

Authorize Vice Chair Dubuc to attend the March 20, 2012 meeting of the BoF as the representative of the Seward AC. Motion by Casey, second Hatch.
Vote 10-0-0.

Authorize AC member Campbell to attend the January 13 BoG meeting as the representative of the Seward AC. Motion by Casey, second Collman.
Vote 10-0-0

Prince William Sound Proposals – Comments due by November 18, 2011

Proposal 44 Hubbard/Hatch 6-3-1
Discussion lead by Hubbard who is an active participant in the longline fisheries. Notes increase in rockfishes offshore and assumes the same may be true in PWS. Notes this person is one of the few or only deep water shrimp trawler in the Sound and is asking that money from his mandatory retention of rockfish and black cod go to the fishermen, in this case him, instead of the state. Proposer wants the current 10% by catch to be raised to 30% for fishermen. Noted GH of 150,000# has not been reached for rockfish. Who gets the money?

Proposals 45, 46, 47 – No Action

Proposal 48 Dubuc/White 9-0-1
Locally there are large numbers of sexually immature spiny dogfish that negatively impact other sport and commercial fisheries. Feel increasing the limit would have benefits. Acknowledge that they are slow to reach sexual maturity [males 20 years, females 30 years according to Bosch]. Also seem to see large numbers of the population moving in our region. At this point a commercial fishery is not viable.

Seward Fish & Game Advisory Committee Meeting

Minutes of November 10, 2011

City of Seward Council Chambers

Proposal 109 Hatch/Dubuc 0-6-4
Needs more evaluation. Consider alternatives.

Proposal 110 –no action

Proposal 111 Hatch/Dubuc 0-9-1
Allocation. Do not agree with modifications to the cost recovery plan currently in place.

Proposal 112 Hatch/Clemens 8-0-2
Allocation.

Proposal 113 Hatch/Hubbard 0-8-2
Believe this is not a significant problem. Know proving spotting from an aircraft would be difficult in this era of cell and sat phones. Leave it alone.

Proposal 114 and 115 Hatch/Dubuc 0-9-1
Similar proposals but see it as allocative. Do not buy the argument that the PWS hatcheries are a “false ‘commercial’ entity.” Disruption of the status quo. Negative implications for investments by the fishermen and the hatcheries.

Proposal 116 Dubuc/Hubbard 0-7-3
See homepack as a traditional use of the resource by commercial fishermen. Do not see it as a problem. See the motivation of the Fairbanks group but we take the opposite side.

Proposal 117 – 124 -no action

Proposal 125 Collman/Clemens 8-0-2
Seems good means to protect the cutthroat trout population given the unknown status of the population. Lingering effects of the Exxon Oil Spill still uncertain.

Proposals 125-138 – no action
We wonder if proposal #71 was actually supposed to be #131. Regardless we taken no action.

➤ Proposal 371 Hatch/Dubuc 10-0-0
Proposal submitted by our advisory committee. Will allow better information to ADF&G on the status of shrimp populations across this portion of the North Gulf Coast via mandatory reporting required by the conditions of the permit. Easier

**Seward Fish & Game Advisory Committee Meeting
Minutes of November 10, 2011
City of Seward Council Chambers**

access to shrimp grounds for personal use from the port of Seward. Resource appears to be healthy.

**Statewide Game Proposals to be Considered January 13-17, 2012
Brown Covered Book**

Proposals 46 and 47 White/Herbert 0-10-0
We do not like the idea if a person's "wall is full" that they might sell trophies. It implies market hunting. Individuals can give away unwanted mounts and hides.

Proposal 56 White/Hubbard 6-0-4
See the use of crossbows as common in other states. Do not have any significant advantage over other high tech bows. Would allow certain people with handicaps or infirmities to participate in an archery hunt.

Proposal 59 White/Clemens 7-0-3
Seems an excessive and expensive requirement for bow hunters targeting bear and moose. As an option for hunters it is acceptable, but not a requirement.

Proposal 65 Dubuc/Clemens 9-0-1
Seward AC proposal seeking to allow better distribution of a limited number of drawing hunting permits among an ever growing number of hunters. Given the cost of many hunts it seems extravagant to be participating in a large number of drawing permit hunts. Seek equitable distribution of hunting opportunities.

Proposals 71-74 McRae/White 0-10-0
We see these proposals as disenfranchising a lot of people. This type of staggered start has been used in Canada to the great disadvantage of the group starting late. Will result in a negative economic impact on guides and businesses that rely on non-resident hunters. One AC member never felt he was at a disadvantage hunting the regular season when in the field with non-resident hunters.

Proposals 92 – 94 White/Dubuc 0-9-1
See this as severely limiting the harvest. Some members feel there is already enough of a problem with predators and want to see no reduction in methods and means.

Proposal 102 Dubuc/White 0-9-1

Proposal 361

Action: Support

Description: Shrimp pot fishing seasons for Registration Area E. Close the commercial shrimp pot fishery in PWS

Discussion: This proposal is supported in an attempt to head off what seems to be an inevitable destruction of the fishery by a commercial interest that is many for a return that is negligible. It does not make sense to allow a commercial fishery (80 commercial interests) for a gain of \$200,000 dollars. \$2500 net gain and a negligible profit for the "commercial interest" is risking the sustainability of this resource to Alaska citizens who are simply utilizing the shrimp to help feed their household. The fishery appears to be sound enough to sustain the relatively minimal impact of personal use and it does not appear to be able to sustain the much greater impact of the commercial fishery.

Opposing the proposal feel there may be alternative ways to manage the fishery such as close certain days to commercial fishing rather than simply close it.

Proposal 371

Action: Unanimous Support

Description: Personal use shrimp fishery. Extend the eastern boundary for the North Gulf Coast Personnel Use Shrimp Fishery to Cape Fairfield.

Discussion: The committee supports this proposal with the caveat that there is sufficient evidence that there are enough shrimp stocks to support a harvest. There seems to be little data available on this particular section of real estate and while data from hosting the fishery would be helpful it would seem there should at least some evidence of a harvestable stock before it is opened.

Proposal 372

Action: Support

Description: Subsistence miscellaneous shellfish fishery. Waters; seasons; bag, possession, and size limits; and special provisions for Cook Inlet-Resurrection Bay Saltwater Area – Personal Use Clam Fishery.

Discussion: Limits the aggregate bag and possession limit for littleneck clams and butter clams to 80. The current regulation allows an aggregate limit of 1,700 clams. Given the pressures that are mounting in these areas regarding the taking of clams there seems no justification to allow a literal commercial harvest level by every individual who clams these waters. Eighty (80) clams seems more than sufficient to provide for the needs of individuals utilizing this resource. Everyone who has utilized these clamming areas has noted the decline in numbers of clams and it seems the appropriate time to curtail the rape of this resource.

One opposing viewpoint wants to be able to fly in and get all of the clams they want for the year on one trip.

Homer Fish & Game Advisory Committee Meeting Minutes of January 23, 2012

Members Present: Tom Hagberg, Marv Peters, Skip Avril, Trina Fellows, Michael Craig, Joey Allred, Lee Martin, George Matz, Gary Sinnhuber, Gus Van Dyke, Jim Meesis

Staff Present: Trent Chwialkowski – Anchor Point AWT; Steve Miller – FWS; Carol Kerkviet, Elisa Russ, Charlie Trowbridge, Sherry Wright – ADF&G

Elections were held with the following results: Member Clifford Calkins passed away, leaving another vacancy on the committee. Nominations were: Gus Van Dyke, Thomas Hagberg, James Meesis, Michael Craig, Joey Allred, Jr and Tabor Ashment. Tabor Ashment was elected to fill the remainder of Clifford Calkins seat (one year) and the rest were elected for three year seats. There were no alternates elected.

BOF Call for Proposals – an announcement was made that the call for proposals had been issued.

Steve Miller – FWS gave a brief summary of FWS response to Elaina Spraker’s “Voices of the Peninsula” article. Discussion of FWS policies regarding predator control and habitat enhancement efforts and at what point they would begin those type of activities was also held.

RECEIVED

BOF Statewide Shellfish Proposal Comments

MAR 05 2012

Statewide Scallop

BOARDS
ANCHORAGE

Proposal 350

Action: Opposed 0-10-1

Description: Allow scallop harvest from multiple registration areas when an observer is aboard.
Discussion: This would affect all areas except Cook Inlet, because a different type of gear is required in Cook Inlet. This puts an observer in an unpleasant situation. Everybody else has to go in when they change areas and the department uses the information they obtain. They also get valuable contact and conversations with the fishermen when they come in.

Prince William Sound Scallop

Proposal 351

Action: No action

Description: Establish new management district subsections for scallop in PWS.
Discussion: This is mostly housekeeping.

Attn: Shannon
BOF SW Shellfish
on time AC comments

Prince William Sound Shrimp

Proposal 365

Action: No action

Description: Restrict operation of sport, personal use, and subsistence shrimp pot gear by persons or vessels participating in the commercial shrimp pot fishery.
Discussion: A good, honest commercial fisherman should be able to put some pots out. Commercial fishermen sometimes use sport fishing to find out what is in another area and determine if they may want to fish there the following year. Pots would be marked differently. There hasn't been a commercial shrimp fishery around here for years.

Homer Fish & Game Advisory Committee Meeting Minutes of January 23, 2012

Prince William Sound Miscellaneous shellfish (except scallop)

Proposal 372

Action: Support 11-0

Description: Reduce the bag limit for hardshell clams in Cook Inlet to 80 clams per day of any species.

Discussion: Committee wondered why there is a commercial fishery open when there is a concern warranting such a small harvest. The response was that it is a closely monitored fishery that the biologist moves around if there is a concern of overharvesting one area. The fishery can be closed by Emergency Order. 80 clams is enough for anybody per day. All user groups will share the burden of conservation.

Statewide Shellfish

Proposal 374

Action: 10-0 – 1 Support

Description: Clarify restriction on use of sport, personal, or subsistence-caught shellfish by owner, operator, or employee of a lodge, charter vessel, or other enterprise that furnishes food, lodging, or sport fishing guide services.

Discussion: This is a continual complaint that Public Safety deals with. This may require the lodge owner to fish two days with that client desiring this legally, or the client could set pots in the morning and pull them in the evening of the same day. Community doesn't like to see charter operators fishing on behalf of their clients, but if a client is fishing legally, that would be OK.

Proposal 375

Action: No action

Description: Require that commercial shellfish pots constructed of rigid mesh have a biodegradable escape mechanism identical to that required for subsistence, personal use, and sport shellfish pots.

Discussion: This would align the regulations.

Proposal 376

Action: Support 11 - 0

Description: Clarify regulations regarding use of hook and line when taking octopus.

Discussion: This is housekeeping.

BOG Update – Marvin spoke briefly about proposals of interest to the community and his participation in the BOG meeting.

Next meeting will be Monday, February 13th at 6:00[^] pm at the NERRS building to discuss proposals to submit to the BOF and/or BOG and any other business that may properly come before the committee.

Meeting adjourned at approximately 8:00 pm.

ACTIONS OF THE WRANGELL FISH & GAME ADVISORY COMMITTEE

AT IT'S MEETING OF DECEMBER 29, 2011

Members Present: Tom Sims David Rak John Yeager
(9) Marlin Benedict Janice Churchill Chris Guggenbickler
Robert Rooney Alan Reeves Otto Florschutz

ADF&G Employees Present: Tom Kowalske - Wrangell
Troy Thynes – Petersburg video conference
Doug Fleming – Petersburg video conference
Kevin Clark – Petersburg video conference

USFS Employee Present: Robert Larson – Petersburg video conference

The meeting was called to order by Tom Sims, Committee Chair at about 7 PM. Introductions were made in the room and for the videoconference. To set the tone for the meeting, Tom stated that although many proposals may allocate resources among user groups, he expects all participants to be civil when making their points, and remember we are all neighbors.

Following are the results of the Wrangell Advisory Committee's actions on the proposals presented in the Alaska Board of Fisheries, 2011/2012 Proposal Book. Listed here are the Southeast and Yakutat Finfish proposals the Wrangell Committee chose to act upon during its meeting. Actions on other proposals in that Book will be considered at a meeting planned for January 5, 2012.

Robert Larson addressed the AC and requested proposal 249 submitted by the Southeast Alaska Subsistence RAC be considered first.

Proposal #249 PASSED AS AMENDED

Motion to adopt by: Chris Second by: Alan

Number in favor of proposal as amended: 9

Number opposed to proposal as amended: 0

Number abstaining: 0

Amendment to Proposal 249: The annual limit for nonresidents is one daily bag limit (of 6 fish) per salmon species; with no more than 10 salmon overall combined total, excluding King salmon. (King salmon were first included, but later excluded.)

Motion to amend by: Chris Second by: Janice

Number in favor of amendment: 9

Number opposed to amendment: 0

Number abstaining: 0

Comments: Robert explained to the AC that the proposal was submitted with "XX" for the annual nonresident salmon limits, with the expectation that the ACs will recommend different numbers to the BOF. Two possession limits have been recommended by other ACs.

Doug shared with the AC it is typical to take other steps, such as reducing bag and/or possession limits, before setting an annual limit.

Discussion on Proposal: It could be ok to set an annual limit for Coho salmon, but not other salmon. Setting the annual limit on Kings has caused a shift to silvers, and the sport take of silvers is now very large.

SSRAA is trying to raise more Cohoes, because there is not enough Cohoes in the water. Other salmon such as pinks, dogs and sockeye are generally targeted for charter fishing. With the current limits on halibut take, placing limits on salmon take would result in an unmarketable charter fishing opportunity to non-residents.

There are too many sport caught salmon leaving the state: with an example of a yacht having to buy another freezer, prior to heading south, to hold their sport catch. SSRAA is working hard to put more salmon in the water and the commercial gear groups are fighting for those fish. It is OK to have a yearly bag limit for non-resident salmon take, and two bag limits is plenty of salmon for a non-resident. All AC members favor

Proposal 374 Brennon/Brian PASSED 10-0. This AC has been supportive of this in Southeast and feels it should be put into Statewide Regulation. If the guide is providing their personal or sport caught fish to clients then they are selling it and this is a commercial venture and needs to be illegal.

Proposal 375 Otto/Alan PASSED 10-0. We are supportive of this but want to make sure that regulations are not changed in regard to the current view of a commercial Dungeness pot that is webbed using stainless wire and using the cotton on the door hook for the escape mechanism.

Submitted by Brennon Eagle

Alaska Department of Fish and Game

Tyonek Fish and Game Advisory Committee

Al Goozmer, Chairman

Report

RECEIVED

JAN - 9 2011

BOARDS
ANCHORAGE

Salmon; Salmon and related fishery report at:

Through our efforts, some progress was made in the area of equity and distribution of these resources for *commercial use*. There still remain inequity, the imbalance remain in favor of the drift net fleet. It was my intention to bring this issue to light, strike a unified effort to bring a balance, and to increase harvest opportunities through change in fishing gear to the time allotted.

I would suggest pushing more proposals as we have done in the past, as the TAC continue to be a voice in the ADF&G, you will be heard and let the Department know that their reports indicate the problem.

Subsistence fishing is also slow to change, change has taken place since 1981, but the balance on resources, specifically the king salmon we use has been taken away from us, for the most part on the restriction of gear and time.

I believe the TAC should continue to push for gear and time to adequately harvest the resources to meet our needs

→ *Subsistence clams*; As of this report our proposal to reinstate our area on the Polly Creek as *Tyonek Subsistence area* (proposal 373). The BOF in Juneau this week, I have no report.

Hooligan harvest, reports indicate, during the past recent years the fishery has harvested over 100,000 pounds a season. One year the report indicates a harvest of 126,000 pounds.

It is my suggestion that TAC make a concerted effort to bring this harvest to an end. This resource is vital for the salmon, seals and beluga and other species.

Moose, ADF&G and other report att;

The tier II is slated for elimination for the 2013 season.

There are no scientific reasons for this proposal but I speculate that other special interests are involved, and I would suggest a battle plan for this move.

Predator control, No report, on brown bear, black bear, I believe this practice has gone on long enough, there are no control measures in the harvest. Reports of carcasses left on side of road, snaring area unmarked, again no control measures.

I would suggest the TAC coordinate a program with the enforcement division to work with you to ensure our needs are met and outside interests are controlled.

Other areas of interest are the rodent and small predator population. As the major predators are taken out, the small predator increase very rapidly, this is the case we now see. There are no concerns at this time, but the issue should be monitored close.

It was a pleasure to serve with you and I know that diligent effort to improve our opportunities to harvest the resources will be met.

Al Gozmer, Chairman

BOF SW Shellfish mty

False Pass Fish & Game Advisory Committee Meeting Minutes of March 2, 2012

The committee teleconference meeting began at 2:05 pm. The current roster includes the following people:

Members Present: Tom Hoblet, Travis Hoblet and Gilda Shelikoff

Present at the False Pass Council Chambers: Tom Hoblet, Travis Hoblet, Ken Parker, Monte Chitty, Carleen Hoblet, Nick Nevzoroff, Carlyn Hoblet

Present at Anchorage F&G office: Gilda Shelikoff, Ken Smith, Sherry Wright

Present in King Salmon F&G office: Meghan Riley

Present in Kodiak F&G office: Mark Stichert

*Attn: Shannon
on-line AC Comments
BOF SW-Shellfish*

The purpose of the meeting was to re-active the committee. The last set of minutes that could be found was from 2003. Sherry requested that Tom send the sign-up sheet from False Pass with email contact information to help for future meetings.

Board of Fisheries proposals due April 10

P-cod Western Gulf Allowable Biological Catch – discussion of harvest by the pot sector out of federal TAC. Mark had faxed information that included the last five years. A request for the last ten years of harvest information was made. Discussion of a proposal to allow up to 55% of the TAC for pot and jig sector in the state water season was held.

Boundary line discussion for shellfish registration area and how it would affect fishery. NMFS would have to be involved in that process. A cautionary approach to this might be wise.

Salmon fishing periods 5AAC 09.320 (b) (2) Bechevin Bay section modified to except not open more than four consecutive days with a 3 day closure, rather than by emergency order only.

Mark brought up a scallop proposal that will be addressed at the **BOF Statewide shellfish** meeting. Gilda moved to adopt. Travis 2nd.

*BOF SW Shellfish
→*

Proposal 353

ACTION: Oppose 0 - 3

Discussion: This type of gear is hard on the bottom of the sea floor. The reason the state closed was to build crab stocks back up. In the last few years even the tanner crab is starting to rebound.

Committee had a discussion of Board of Game proposals to submit.

Election meeting to be held April 6th at 2 pm at the False Pass Community building. We will hold it as a teleconference.

Meeting adjourned at 3:37 pm.

ANCHORAGE**

March 3, 2012

Alaska Department of Fish and Game
Boards Support Section
PO Box 115526
Juneau, AK 99811

Subject: Unalaska /Dutch Harbor AC comments, on Statewide Dungeness Crab, Shrimp and Misc Shellfish proposals 345-386 for the BOF March 20-23, 2012 meeting in Anchorage, AK. The Unalaska Advisory Committee took the following action on proposals 348, 350, 355, and 374 at there December 17, 2011 meeting and on March 3, 2012 meeting held in Unalaska, Alaska the Unalaska AC addressed proposals 380, 382, 384, and 386.

Proposal 348-5AAC32.425. Lawful gear for Registration Area J Implement 1,000 pot limit per vessel as follows: Motion to support, Don Graves second Dick Peck. Discussion, committee didn't support this proposal as written, there isn't an over-capitalization issue in the Aleutians, and North Peninsula areas. Less than six vessels usually fish Dungeness crab in these two areas. A pot limit of 1,000 pots would be to overly restrictive and would have major economic impacts on these vessels. Motion to support failed 7-0

Proposal 350-5AAC 38.076. Alaska Scallop Fishery Management Plan: Allow scallop harvest from multiple registration areas when an observer is aboard as follows: Motion to adopt by Don Graves second by Dick Peck. Committee members felt that as long as the observers are on board 24-7 that this proposal should be supported. Motion to support passed 7-0.

Proposal 355-5 AAC 38.41X. Registration Area J Octopus Management Plan Establish octopus management plan for registration Area J as follows: Motion to support Don Goodfellow second Reid Brewer, committee felt an octopus management plan was needed, especially with actions taken on the federal side in increasing the octopus TAC significantly. Motion to support passed 7-0.

Proposal 374-5AAC75. XXX. Closed Waters and Prohibited Acts; 5AAC 77.XXX. Methods, Means, and General Restrictions. Proposal by the Department of Public Safety, clarify restrictions on use of sport, personal or subsistence-caught shellfish by owner, operator, or employee of a lodge, charter vessel or other enterprise that furnishes food, lodging, or sport fishing guide services as follows: Motion to support, by Don Graves, second by Mike Holman. Committee felt that the regulations in this area needed tightening up; committee members have heard concerns over abuse in this area. Motion to support passed 7-0.

Proposal 380 -5AAC 39.975(XX) Definitions. Establish a definition for anchor roller as follows: Motion to support by Don Goodfellow second Dick Peck, discussion the committee felt that the Board of Fisheries was taking the right action in getting this issue defined and set into regulation, many of the committee members have heard about and had seen vessels that might have been out of compliance with State law. The motion to support passed 5-0

Proposal 382-5AAC34.612. Harvest levels for Golden King Crab in Registration Area O. Increase total allowable catch in the Aleutian Island Golden King Crab fishery due to the lack of adoption of the new stock assessment model by crab plan team as follows: Motion to support by Don Goodfellow seconded by Steven Gregory. Discussion, committee overall felt that, with further delays in getting the assessment model completed by ADFG and the overall continued very good performance of this rationalized fishery with high catch per unit effort that TAC for this fishery for almost 20 years has been between 5-6 million pounds. That most of the committee members supported taking a position to support the proposal. It was discussed that this fishery has only 5 vessels fishing in both districts and that the total number of pots has been reduced to only 5,000 pots from over 10,000 pots before rationalization, this fishery is also observed 24-7 and that is where ADFG catch information come from. Heather Fitch ADFG Unalaska office biologist in charge, stated that the ADFG will oppose proposal 382 that they feel that an assessment model should be in place before an increase to the TAC is granted, there still is a lot of unknowns in this fishery and they would like the model in place and more information and survey information in place before an increase is granted. Committee members felt that this fishery warranted an increased TAC it was pointed out that an increase in the TAC would also bring increased economic activity to Unalaska especially from crab deliveries from the Eastern district that would be processed in Unalaska.

Proposal 384-5AAC34.816 (a)(1). Bristol Bay King Crab Harvest Strategy. Amend regulation as follows: Motion to support Don Goodfellow, second Kristejen Laxfoss. Discussion, this proposal removes the minimum stock threshold level of 4.0 million pounds; this threshold level is no longer needed, since the Bristol Bay Red Crab fishery is now rationalized and no longer managed in season by ADFG. The committee was in support of the proposal and stated that it was a housekeeping proposal. Proposal 384 was supported by a vote of 5-0

Proposal 386-5AAC02.010.Methods, means and general restrictions; 5 ACC 75.035 Methods and means; 5ACC77.010 Methods, means and general restrictions. Add marking requirements for ring nets in the subsistence, sport and personal use shellfish, fisheries as follows: Motion to support Don Goodfellow, second Dick Peck, this proposal just get the marking for ring net gear into regulation, housekeeping issue the committee supported the proposal 386 by a vote of 5-0.

PO Box 162 Unalaska, AK 99685

ADVISORY COMMITTEE MINUTES

September 17, 2011

UNALASKA PUBLIC LIBRARY MEETING ROOM

1. CALL TO ORDER-Chairman Frank Kelty, called the meeting to order at 12:05 PM on Saturday September 17, 2011.
2. ROLL CALL- present, Frank Kelty, Zac Nehus, Roger Rowland, Dick Peck, Don Goodfellow, and Mike Holman Absent Steven Gregory, Don Graves. Guests included Heather Fitch, Britta Baechler, James Mason and Kristejen Laxfoss
3. APPROVAL OF AGENDA- moved Goodfellow; seconded by Peck motion to approve agenda adopted 6-0.
4. APPROVAL OF MINUTES, from the January 29, 2011 motion to adopt by Peck second by Goodfellow minutes adopted 6-0.
5. LEGISLATIVE BOARD SEAT ELECTIONS

Acceptance of resignation of Katherine McGlashan from the Unalaska Fish & Game advisory committee, motion to accept by Peck second by Goodfellow, the resignation was accepted 6-0.

Nominations asked for Seat H a three year advisory seat, we had two candidates for the seat; they included Reid Brewer he wasn't present at the meeting, but he had verbally expressed interest in severing on the committee. The second candidate was Kristjan Laxfoss, he told the committee why he wanted to serve, and gave us some background information on his commercial fishing and processing experience in the BSAI region. There was some discussion of expanding the committee to accommodate both candidates, or to have an alternate position appointed, the committee decided to vote on the two candidates they had before them. Voting was held by secret ballot, the first vote was a tie 3-3 ballots were counted by the Chairman. Another vote was held and

Mr. Laxfoss won by a count of 4-2 and he joined the committee at the table.

6. ADFG UNALASKA OFFICE FISHERIES UPDATE,

a. Heather Fitch, the ADF&G Unalaska regional biologist gave update on Crab Plan team meeting to be held in Seattle next week. She updated the committee on the Brown King Crab assessment model and the crab stocks under review for the NPFMC Safe Document. She stated; it would be at least two weeks before the TAC amounts would be announced by Fish & Game for the October 15, 2011/12 crab seasons. ADFG staff member Britta Baechler, give an overview of the following fisheries; the Eastern Aleutian Bairdi Tanner fishery, the survey work completed by ADFG showed very few Bairdi Tanner Crab in the Eastern Aleutians districts. Of the three Eastern Aleutian districts, Makushin Bay area looked the best and would possibly open. The Aleutian Island Golden King crab fishery was discussed with the most current harvest results were given fishery is performing well with a high CPUE per pot lift. Unalaska Food & Bait Herring fishery, and Unalaska Island Pink Salmon fishery numbers were discussed as well why these fisheries are managed out of the Sand Point office and not in Unalaska. The McLees Lake Red Salmon subsistence harvest was discussed and escapement levels are estimated at about 40,000 fish thru the weir for that system in 2011. ADFG has announced that ADFG Comfish division has taken over the weir operation from US Fish and Wildlife for 2012 salmon season.

7. OLD BUSINESS

Sportfish issues were addressed, with Don Tracy Sportfish biologist for the westward area based in the Kodiak office. Don discussed many issues with the committee; his concern with budget cuts the sportfish division is taking that he doesn't have allotted of resources available to assist us. He was pleased to hear that Comfish had money to run the weir at McLees Lake in 2012. Salmon stream baseline survey work needs to be continued on the local streams, especially for the Coho and Red salmon stocks. He urged us to contact our legislators about the situation in the Aleutians and ask for support for the sportfish budget.

Don also thought, we should look into some enchantment grants that could help the Unalaska Schools District hatchery program to enlarge to assist the Red and Coho runs. We discussed the Dungeness Crab Sport Fish bag limit and the concern with poor catches in the Unalaska Bay. Discussion centered on whether we should change the bag limit, not all of information on the Dungeness situation the catches aren't

tracked, and it would have to be taken up out of cycle ACR request in October of 2012. The committee reviewed the response to letters from Jeff Regnart, Director Com Fish, Charles Swanton Director Sport Fish, and Aaron Potter, Alaska Peninsula Area Management Biologist. The Committee's priorities and continued concerns will to be relayed to ADFG Kodiak, Sand Point and Juneau headquarters on various Unalaska ADFG commercial and sportfish needs, which include staffing, salmon stream survey work, enchantment and habitat issues in the Unalaska area.

8. NEW BUSINESS,

- a) Review of Agenda Change Requests for the BOF work session in Anchorage on October 4-5, 2011. The committee took action on ACR # 9 the motion and action ACR #9 is listed below.

ACR # 9 Increase total allowable catch in the Aleutian Island Golden King Crab Fishery due to the lack of a new stock assessment. Motion to support was made by Don Goodfellow seconded by Zac Nehus to amend ACR#9 with the following statement. The Unalaska /Dutch Harbor AC encourages ADFG to complete the stock assessment model as soon as possible before further increases in the Aleutian Island Golden King Crab Fishery TAC,s are adopted. Motion passed 7-0

- b. Review of BOF proposals for the October 6-10, 2011 for the South Alaska Peninsula, Kodiak, Chignik, PWS and Cook Inlet. The Committee addressed proposals 20-33 action taken is listed below.

Proposal 20 under 5AAC 28.577. South Alaska Peninsula Area Pacific Cod Management Plan. Open state-waters Pacific Cod season seven days after the federal Western Gulf of Alaska A season Pacific Cod pot sector closes. No motion made to support.

Proposal 21 5AAC 28.577. South Alaska Peninsula Area Pacific Cod Management Plan. Open state-water Pacific Cod season on March 1st or seven days after federal Gulf of Alaska Pacific Cod pot cod sector closes, whichever is later Discussion, pot cod harvesters from Unalaska area felt a later opening would be beneficial for allowing there participation in the fishery. Motion to support, proposal 21 by Zac Nehus, second by Roger Rowland, motion to support passes 7-0.

Proposal 22 5AAC 28.577. South Alaska Peninsula Area Pacific Cod Management Plan. Open state-water Pacific cod season on March 15, or seven days after federal Western Gulf of Alaska cod sector

closes if that closure is later than March 15. No motion made to support.

Proposals 23-31 5AAC 28.577 South Alaska Peninsula Area Pacific Cod Management Plan; these proposals all have to do with various increases to the jig gear allocation in the South Alaska Peninsula Area Pacific Cod fishery. Discussion, committee felt increases to the jig sector would adversely impact other Pacific cod harvesters that use other gear types, it should be noted that this fishery is already fully utilized. Motion to support, by, Roger Rowland, second by Don Goodfellow, motion fails 7-0.

Proposal 32- 5AAC 28.570. Lawful Gear for, South Alaska Peninsula Area; repeal one definition of mechanical jigging machine gear as follows a single continuous line with no more than 150 hooks. Motion to support; Roger Rowland, seconded by, Don Goodfellow. Discussion, housekeeping issue, ADFG submitted committee had no problem supporting the department, and motion to support passed 7-0.

Proposal 33 – 5 AAC 28.555. Description of South Alaska Peninsula Area Districts and Sections; amend regulatory description of South Alaska Peninsula groundfish district and sections as follows. Motion to support, Roger Rowland, second by Don Goodfellow, discussion, housekeeping issue from ADFG, committee had no problem supporting the department and felt it was prudent to update the demarcation lines and coordinates, for the area, motion to support passed 7-0.

- c. Reviewed agenda of the North Pacific Council which will be held in Unalaska October 4 through October 9, 2011.

9. VOICE OF THE MEMBERSHIP, Discussion on committee member Zac Nehus to attending the October BOF work session and regular meeting in Anchorage, Chairman Kelty would work with Zac Nehus, to setup travel arraignments to Anchorage to attend the meeting.

10. PUBLIC COMMENT, no public comment.

11. NEXT MEETING DATE and TIME,
Chairman Kelty will call meeting probably in early January of 2011.
Motion to adjourn by Peck seconded by Goodfellow

12. ADJOURMENT at 2:05PM on September 17, 2011

ADVISORY COMMITTEE MINUTES FOR

Saturday December 17, 2011

UNALASKA PUBLIC LIBRARY MEETING ROOM

1. CALL TO ORDER-Chairman Frank Kelty, called the meeting to order at 12:00 PM on Saturday December 17, 2011.
2. ROLL CALL- present, Frank Kelty, Zac Nehus, Dick Peck, Don Goodfellow, Don Graves and Mike Holman Absent Roger Rowland, Steven Gregory, Kristenjan Laxfoss. Guest included Heather Fitch, Trent Hartill, Reid Brewer
3. APPROVAL OF AGENDA- moved Graves; seconded by Peck motion to approve agenda adopted 6-0.
4. APPROVAL OF MINUTES, from the September 17, 2011 meeting delayed by Chairman Kelty, he apologized for not having them completed.
5. ADFG UPDATE ON BSAI CRAB FISHERIES AND STATE WATER COD FISHERY,

Heather Fitch ADFG Regional Biologist in charge of the Unalaska office gave an update on the Bristol Bay Red King Crab, St Matthew Blue King Crab and Aleutian Island Brown King Crab fisheries, the update included harvest amounts, and crab per pot numbers were also discussed. Trent Hartill, from the ADFG, gave us a run down on the upcoming January 1st Pacific Cod opening in the Adak area for 60' and under pot, trawl and jig and 58' foot and under for longline the harvest amount for the cod A season is 14 million pounds. During the question and answer period with ADFG staff, a lot of questions by committee members on St Matthew Blue King Crab and Bristol Bay Red King Crab fishery performance and how the fishery performs compared to the NMFS survey data shows. Areas of concerns discussed, included reduced harvest levels, the impacts the fishery has on the first whole sale market, revenues to industry and communities. Committee felt that NMFS and ADFG need to have better modeling and surveys work.

Committee will send a letters or do a resolution to NMFS and ADFG to look into the committee concerns. Don Graves didn't want to wait to address these issues, it was decided to get a letter in to the NPFMC crab plan team and ADFG before plan team goes meets in May. The focus by the committee comments should be on the science and not increasing in crab quotas. A motion by Dick Peck to support a letter to be written by the Chairman Kelty to NMFS NPFMC Crab Plan Team and ADFG asking for increased trawl survey and stock assessment modeling work on the Bristol Bay Red King Crab stock, this motion was seconded by Don Graves and was adopted by the committee 6-0. Another motion was made by Don Graves with a second by Dick Peck was in support of the Aleutian Island Brown King Crab assessment model to be completed as soon as possible and that the committee supported any other additional research or survey work on the Aleutian Island Brown King Crab species. Motion passed 6-0. The committee had some questions on state water cod fishery in the Aleutians for ADFG, on potential impacts on the state water Aleutians Islands fishery with the 14% increase in the combined TAC for the BSAI Pacific cod fishery. Trent form ADFG gave his take on how the fishery would perform.

6. NORTH PACIFIC COUNCIL DECEMBER MEETING UPDATE

Frank Kelty, gave an overview of actions taken by NPFMC meeting in Anchorage in early December he touched on the Pollock and Pacific Cod allocations that were supported by the Council, mentioned Halibut bycatch and crab rebuilding plans that were before Council.

7. LEGISLATIVE ELECTIONS FOR THREE YEAR BOARD SEATS D, E, F AND ELECTION OF OFFICERS FOR THE ADVISORY COMMITTEE

Nominations were opened for seat D, Don Graves nominated Frank Kelty, second by Don Goodfellow, nominations closed, vote was 6-0 to approve. Seat E nominations opened Don Goodfellow nominated Roger Rowland, Don Graves nominated Reid Brewer, a vote was taken, with Roger Rowland received 4 votes and Reid Brewer 2 votes, Roger Rowland was appointed to the board. Nominations opened for seat F, Zac Nehus nominated Dick Peck nominations closed Dick Peck, appointed by a vote of 6-0. Nominations opened for the Alternate seat Don Graves nominated Reid Brewer, nominations closed, Reid Brewer appointed 6-0 to serve a one year term as the committee alternate.

Election of Officers for Unalaska Fish & Game Advisory Committee, for the 2012 calendar year. Nominations opened for Secretary, Dick Peck nominated Mike Holman, nominations closed, and Mike Holman appointed 7-0. Nominations opened for Vice Chairman, Don Goodfellow nominated Don Graves, nominations closed, and Don Graves appointed

7-0. Nominations opened for Chairman, Don Graves nominated Frank Kelty nominations closed, and Frank Kelty was appointed 7-0.

8. OLD BUSINESS

- a). Heather Fitch and Zac Nehus, overview of the October BOF Work Session and BOF South Peninsula Pacific Cod meeting. Zac stated, that Brown King Crab issue at work session, the ACR was granted, and this issue will be on the March 20-23, 2012 Statewide Misc. Shellfish BOF meeting in March in Anchorage. Zac also discussed the changes the BOF made on the P-Cod opening dates and changes to the jig sector allocations.
- b.) Update on Sportfish issues for the Unalaska area, Kelty relayed his conversation with Charlie Swanson Director of Sportfish, in Anchorage. Dick Peck reiterated his concern on the state sportfish budget and the lack of funding and cuts in Dingle-Johnson funds. Trent, discuss stream walking survey work and signage he plans to do during the summer of 2012, he believes the weir will be operated by com-fish at McLees Lake this summer. Dick Peck was tasked with writing a letter that would address Sportfish funding this would go this areas legislators, Governors office and ADFG Management in Juneau, AK. The committee also had a short discussion the local Pink salmon commercial fishery.

8. NEW BUSINESS,

- a.) Reviewed and comment on Statewide Dungeness Crab, Shrimp and Misc Shellfish proposals 345-379 for the BOF March 20-23, 2012 meeting in Anchorage. The committee took action on the following proposals.

Proposal 348- 5AAC32.425. Lawful gear for Registration Area J Implement 1,000 pot limit per vessel as follows: Motion to support, Don Graves second Dick Peck, discussion, committee didn't support this proposal as written, we don't have and overcapitalization issue in the Aleutians and North Peninsula Dungeness crab fishery. Less than six vessels usually fish these areas, a pot limit of 1,000 pots would be to restrictive for vessels fishing are area. Motion to support failed 7-0

Proposal 350-5AAC 38.076. Alaska Scallop Fishery Management Plan. Allow scallop harvest from multiple registration areas when an observer is aboard as follows: Motion to adopt by Don Graves second by Dick Peck. Committee members felt that as long as the observers are on board 24-7. Motion to support passed 7-0.

Proposal 355- 5 AAC 38.41X. Registration Area J Octopus Management Plan. Establish octopus management plan for registration Area J as follows: Motion to support Don Goodfellow second Reid Brewer, committee felt an octopus management plan was needed, especially with actions taken on the federal side. Motion to support passed 7-0.

Proposal 374- 5AAC 75.XXX. Closed Waters and Prohibited Acts; 5AAC 77.XXX. Methods, Means and General Restrictions. Clarity restriction on use of sport, personal or subsistence- caught shellfish by owner, operator, or employee of a lodge, charter vessel or other enterprise that furnishes food, lodging, or sport fishing guide services as follows: Motion to support by Don Graves, second by Mike Holman. Committee felt that the regulations in this area needed to be tighten up, lots of concerns over abuse. Motion to support passed 7-0

- b.) Reviewed and provided comments on the following Board of Board of Game proposals for the Statewide Regulations Cycle B schedule Board of Game meeting on January 13-17, 2012 Anchorage Alaska.

Proposal 63 under Amend 5 AAC 92.050. Required permit hunt conditions and procedures. Increase the number of drawing permits for each species that a person may apply for. Motion to support proposal 63 by Dick Peck, second by Don Graves discussion, committee felt that the increase in applications was warranted Unalaska AC voted 7-0 to support proposal 63.

Proposal 67 under 5AAC 92.050, Require permit hunt conditions and procedures. Limit drawing hunt permits to 10 percent for non-residents hunters; if less than 10 permit available no nonresident's permits will be issued. Motion to adopt Dick Peck second Don Graves, discussion centered on resident priority for these drawing hunts, the majority felt it is justified to have a priority for Alaska residents, especially since it is and Alaskan resource. It was also mentioned of the potential loss in revenue for some guiders who do business with non-resident hunters, many on the committee felt resident hunters also spend allot of dollars with guides and have high travel expenses as well to hunt on prime areas of the state. The motion to support passed 6-0

Proposal 75 under 5AAC Chapter 85, seasons and bag limits. Open youth hunt ten days before other seasons; require hunter education. Motion to support by Don Graves second by Frank Kelty, discussion, focused on concern on the potential of abuse by

hunters using youth hunters to get a head start on big game trophy hunts. The motion to support failed 5-2.

Proposal 104, 5AAC 92.080 Unlawful methods of taking game; exceptions, prohibit the use of deer and elk urine in taking game. Motion to support by Don Goodfellow second Don Graves, discussion this was an ADFG proposal; discussion most thought this proposal would cut down on the potential of abuse and giving some hunters and advantage. Motion to support passed 7-0

9. VOICE OF THE MEMBERSHIP,

Recognition of the late Emil Berikoff Sr. longtime advisory committee member, the committee held a moment of silence in his honor, Emil passed away in early December. Don Graves brought up herring bycatch in the BSAI Pollock fishery and what can be done to utilize this product besides just dumping it at sea.

10. PUBLIC COMMENT, no public comment.

11. NEXT MEETING DATE and TIME,

Chairman Kelty will call a meeting in early February of 2012.
Motion to adjourn, by the chairman.
