Drafted — 10/84

Species	Date(s) Observed	Spawning	Rearing	Migration
Sockeye Salmon	9/11/84	✓		
Coho Salmon	9/11/84		✓	
Dolly Varden	9/11/84		✓	
Cutthroat trout	9/11/84		✓	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

At the time of survey the water level was extremely low. Flow began 200 meters up from the lake through the gravel. Approx. 25 adult sockeye were spawning at the mouth during the survey. One trap was set 15 mins and caught 6 coho salmon, 3 Dolly Varden, and 2 cutthroat trout fry. The stream has excellent spawning gravel throughout.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
