Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

This tributary is not shown on the USGS map. It forks about 200m. upstream. The left fork is smaller but had rearing coho. The right fork, fed by muskeg, was plentiful with coho fry

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
