Nomination # _____

Richard Reed — Regional Supervisor — 9/25/85 Date

OK STS — 10/23/85

TB — Drafted — 10-15-85 Date

Species	Date(s) Observed	Spawning	Rearing	Migration
Coho	7/16/85 8/27/85		X	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Schools of 10-25 juvenile cohos observed in pools throughout this section of stream. Large number of fry suggest spawning probably occurs in this reach of stream because there is a barrier to pink and chum salmon downstream, which probably blocks upstream movement of fry. Upper limits of fish (coho) habitat above this point were not determined

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Don Cornelius

Date: 9/20/85 Signature: Don Cornelius

Address: % ADFG Box 667
Petersburg AK 99833

Signature of Area Biologist: Don Cornelius
