Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

40 coho salmon were observered spawning in 1/2 mile section of stream above Bostwick lake. This verifies that at least coho move above lake and spawner distribution needs to be corrected

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
