Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

The stream is adjacent to my property and I observed migration and spawning activity by the four species during 1985. This year (1986) was the only time that I observed chums spawning.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
