Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration
Pink				
Chum	See notes			
Coho				

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

When the catalog was updated in 1985 these species were deleted from this system. This was not the intention of the correction. The r designation should be removed for the coho, Dolly Varden and Cutthroat Trout. The falls which is a barrier to pinks and chums would also be a barrier to juveniles of the species which were trapped above it. Thus it is obvious adults migrate above the falls to spawn

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

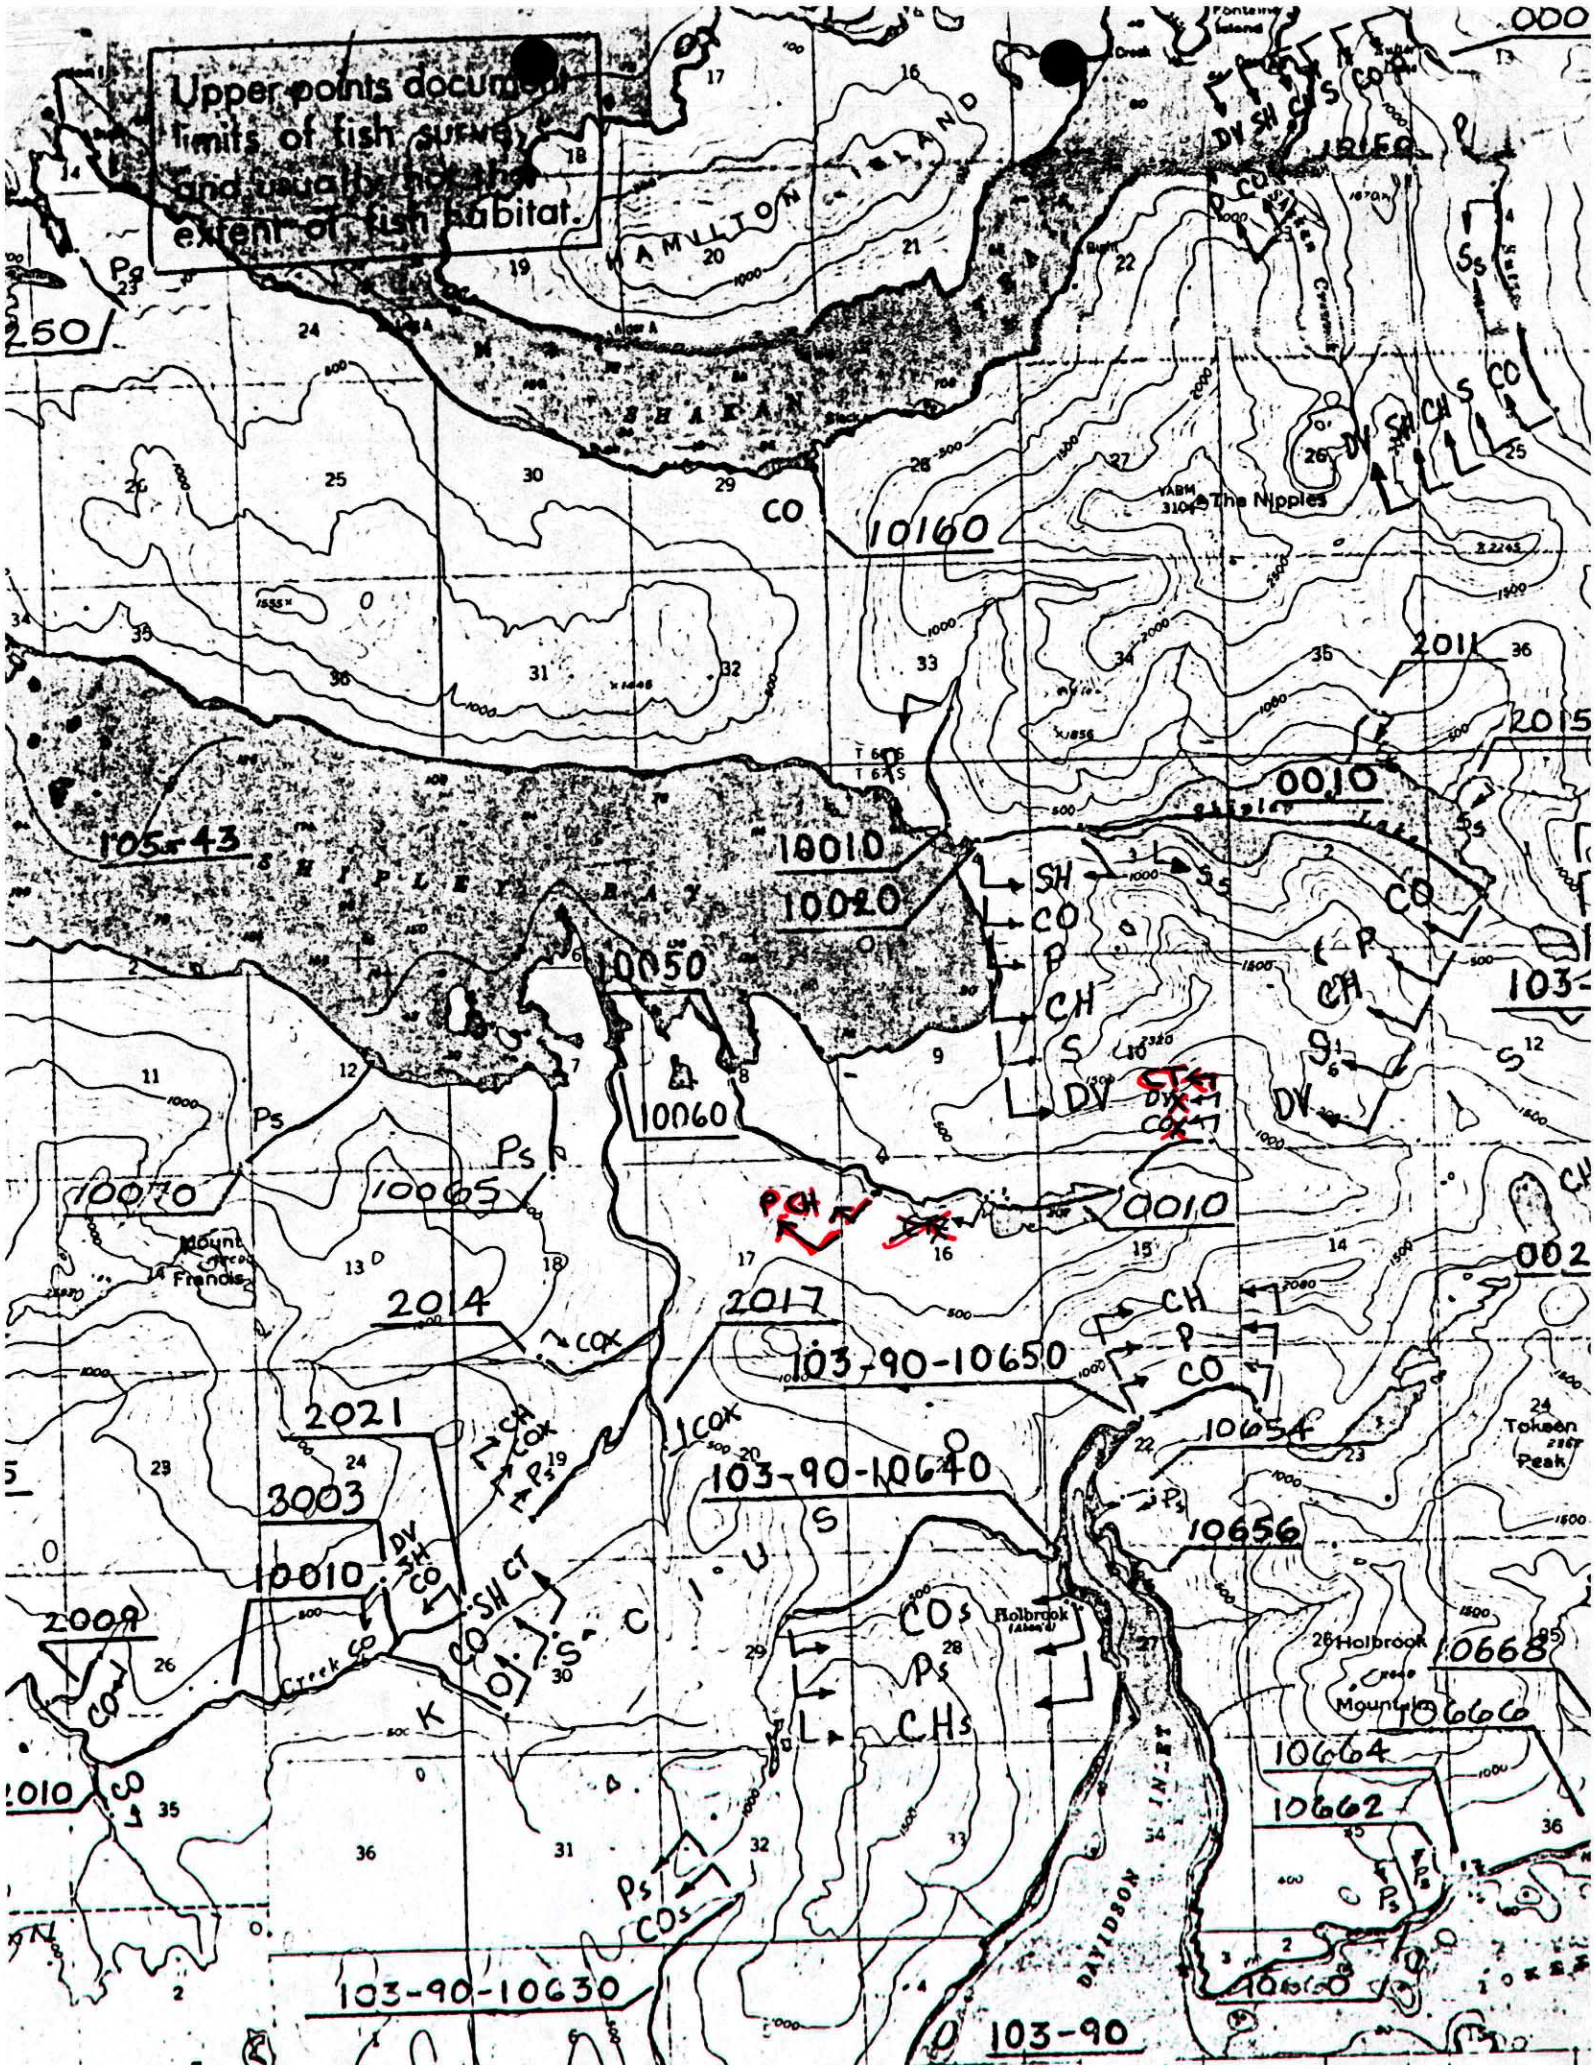
Name of Observer (please print) Craig Burns, Fisheries Technician

Date: 10/13/87 Signature: Not available

Address: ADFG Box 667
Petersburg AK 99833

Signature of Area Biologist: Donald A. Corralin

Comm Fish surveys list peak escapements of 5500 pink, 300 chum and 2 cohos



Upper points document limits of fish survey and usually not the extent of fish habitat.
