| Species | Date(s) Observed | Spawning | Rearing | Migration |
|---|---|---|---|---|
| Pink | | | | |
| Chum | See notes | | | |
| Coho | | | | |
| | | | | |

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

When the catalog was updated in 1985 those species were deleted from this system. This was not the intention of the correction. The r designation should be removed for the coho, Dolly Varden and Cutthroat Trout. The falls which is a barrier to pink and chums would also be a barrier to juveniles of the species which would be trapped above it. Thus it is obvious adults migrate above the falls to spawn.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Craig Burns, Fisheries Technician

Date: 10/12/87 Signature: Not available

Address: ADFG Box 667

Petersburg AK 99833

Signature of Area Biologist: Donald A. Cornelius

Comm Fish surveys list peak escapements of 5500 pink, 300 chum and 2 cohos.
