Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Traps set a couple of hundred yards below lake at headwaters. A new road alignment from Kasaan has recently been brushed near the east side of the creek. There may have already been some impacts to some more potentially uncataloged Coho tributaries

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
