Local name _____

For Office Use

Nomination # 90 67

Richard Reed 10/2/89
Regional Supervisor Date

SOS 11/1/89

FI 11/9/89
Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Delete all but intertidal area and the first 50 feet of upland stream. Above this, habitat does not appear to be suitable for anadromous fish, especially since passage is blocked or severely restricted by large old beaver dam. Flows very low. Stream may have been confused with the watershed to the east, which is large, but has not yet been catalogued.

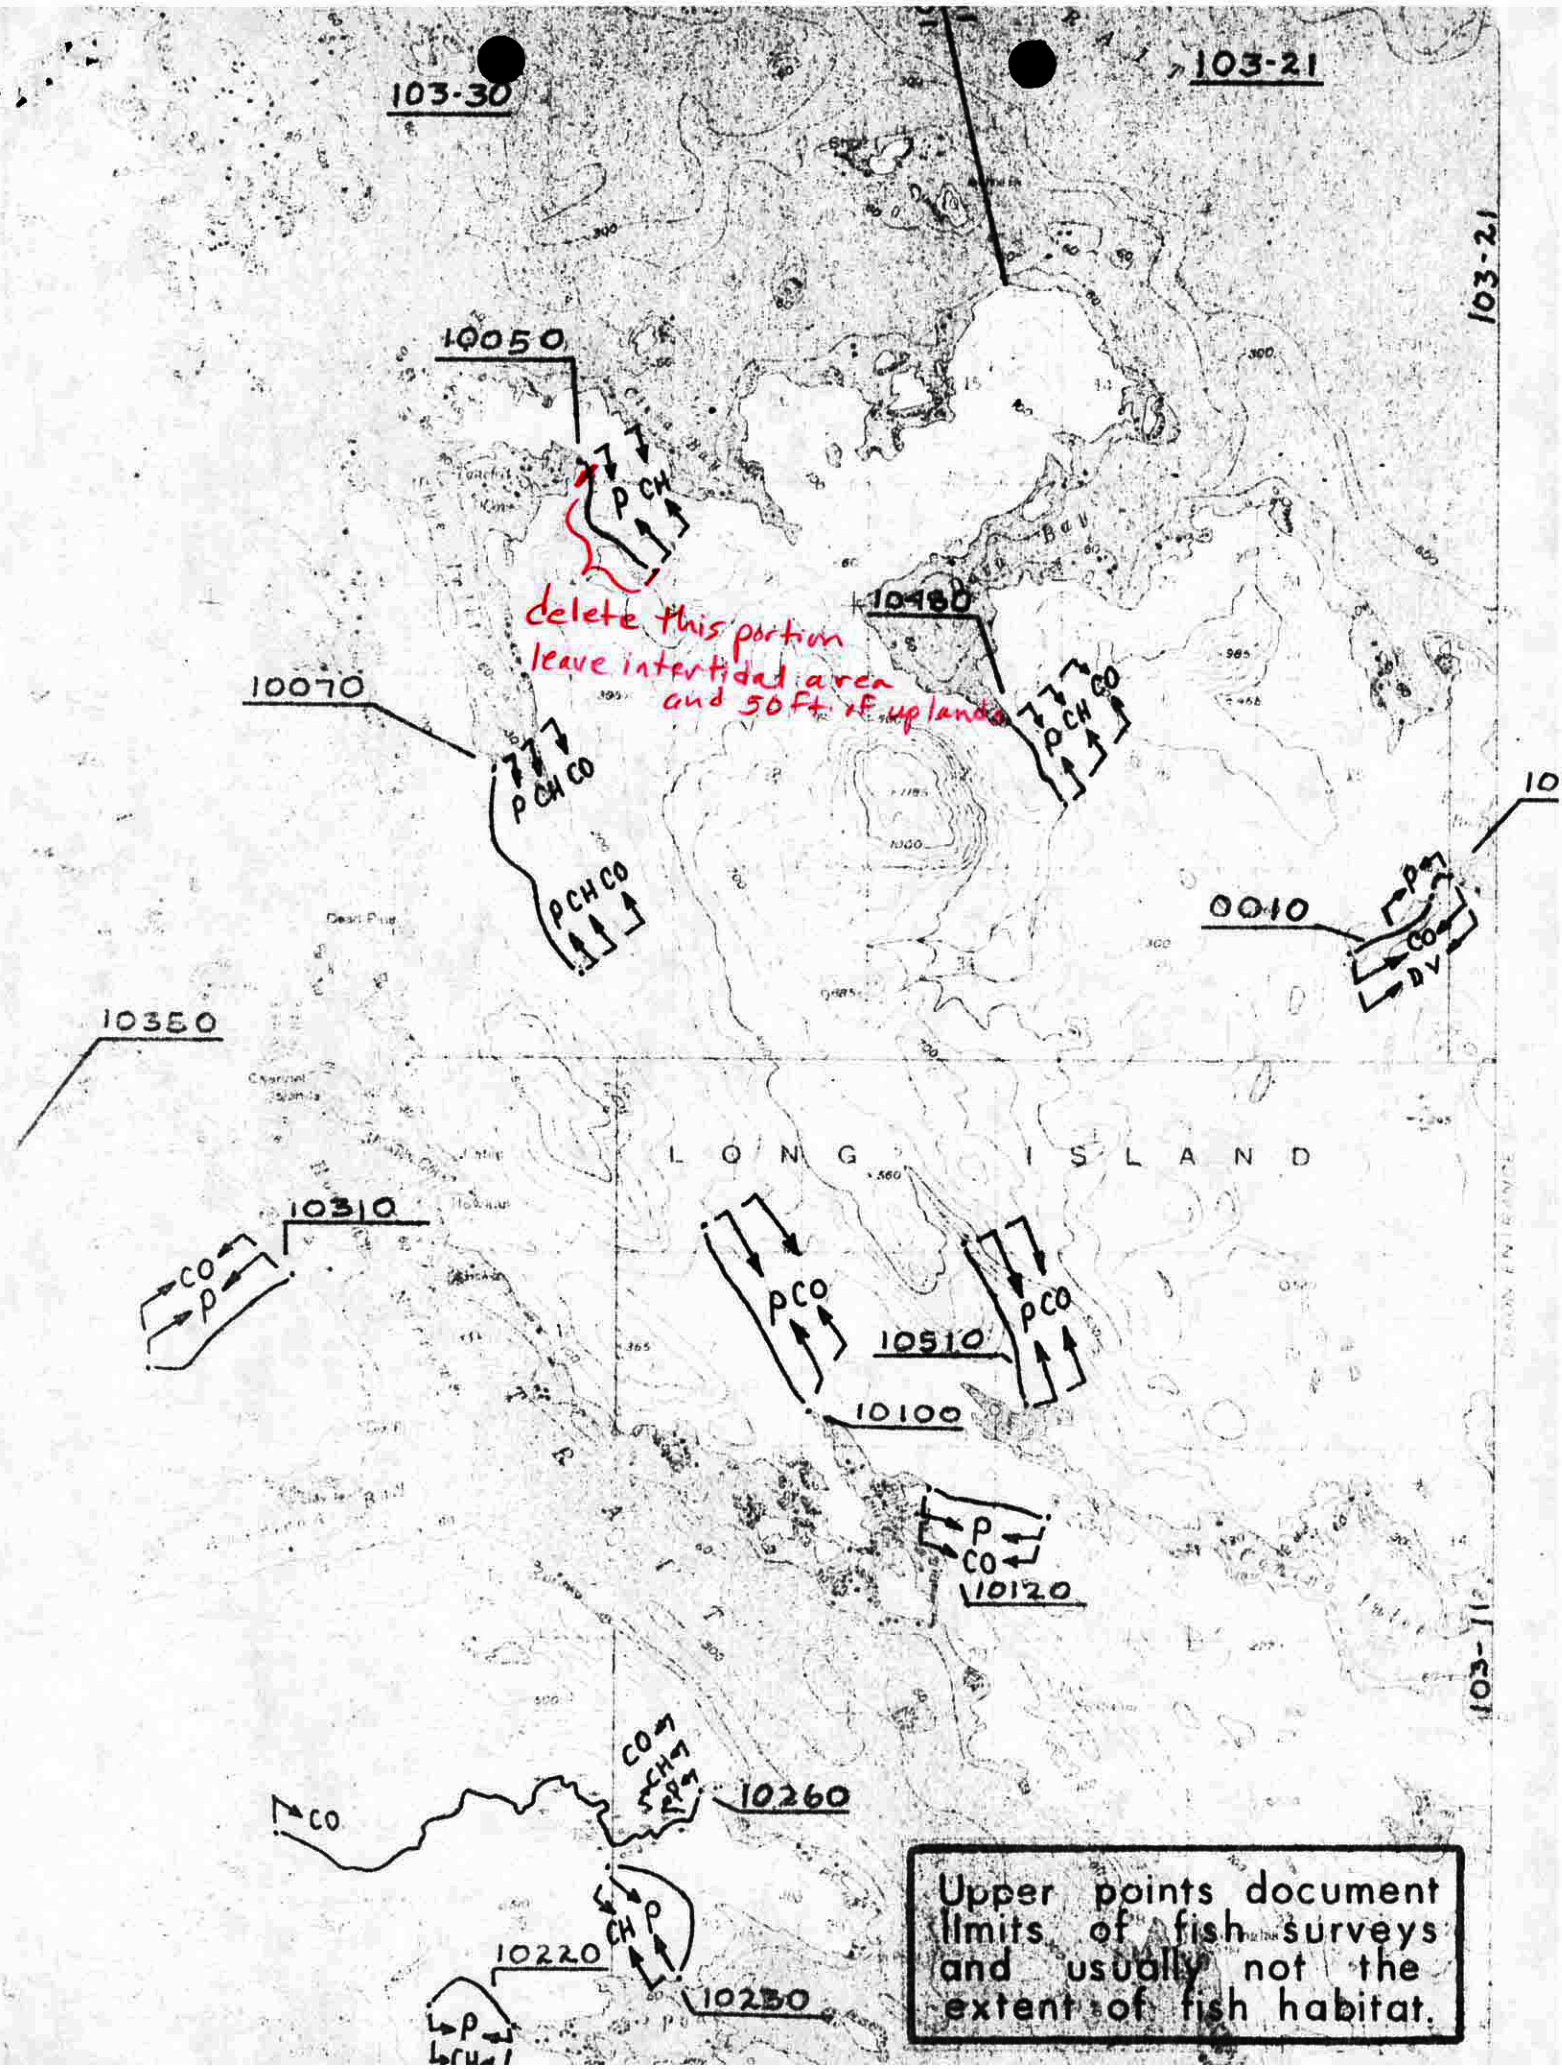
Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Jack Gustafson, Bill Hanson, Jeff Johnson, Ron Wolfe

Date: 7-21-89 Signature: Jack Gustafson

Address: ADFG - Ktn.

Signature of Area Biologist: Jack Gustafson



Upper points document limits of fish surveys and usually not the extent of fish habitat.
