Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

This tributary of Sawmill Creek begins above "trib A" and branches off into two forks draining the DOTPF area. Coho smolt and fry were observed and trapped in both forks. Cutthroat and Dolly varden were trapped along the east fork only

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
