Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Stream is incorrectly drawn on Atlas. Correct as shown. This stream is surveyed every year to enumerate ~~the~~ spawning anadromous cutthroat trout. Eighteen adults were counted in 1984.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
