Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration
unknown	5/14/91		x	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Stream walked during Forest Practices Inspection, 10' wide in lower portion, typically 6-8% up to fork. East fork has habitat for a short ways, then too steep. West fork goes some farther before becoming too steep. West fork main channel, 6' wide at gradient barrier. Fry (coho?) seen just below fork.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Tuesday 14 May 1991 JD

Nicholas Helicopter Field Inspection, South Shore Klawock Lake; Al Peterson, Jon Savage

new plugs + gas in boat

pulled traps in creek #2038 (Last Creek?)

Section 33, Lot #67/68; 3-5' for ways, 66' lake buffer adequate

Lot 69/70; nonshown stream; set 2 traps; 1 Sculpin, 1 RT, 3 DV, 1 CO, gradient barrier ~ 250' from beach dry streambed (silt, flow) seen

hydraulic [illegible]

Stream # 2030?; a little bit at mouth; cutbanks + gravel where channel once was in trees but no water, 66' lake buff adequ

14 May (cont.)

Lot # 87 + Tract 6; Type A around the corner from 2030, on point; 10' at lower; typically 6-8%; 2 forks; E fork a short way then too steep; small; W fork a bit farther 6' wide, begins to step up; unknown fry seen a bit below fork

Sect. 33, Lot #99, Luke Creek, Stream No. 2020; unmaintained extensive beaver dam system w/ multiple channels + ponds; 2 traps set @ 1430; pulled @ 1445; lower trap NC; upper trap 1 DV, 5 CO

Sect. 29; Lot 125 small seep/creek; 66' lake buffer mostly protects

Stream No. 2018, Flower Creek, beaver dam system w/ flow to both sides of point
