~~FI~~ ~~1/23/92~~
Drafted Date

Species	Date(s) Observed	Spawning	Rearing	Migration
unknown	5/13/91		X	

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Stream walked but not trapped. Numerous fry (coho?) seen in pools. Stream ~12' wide at mouth, 5' wide at clearcut where gradient increases. Good gravels and fairly stable banks

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) James D. Durst, Habitat Biologist
