Chignik Weir Sockeye Salmon Stock Composition Summary #3

This is the Alaska Department of Fish and Game with an update regarding genetic stock composition estimates for sockeye salmon from the Chignik River weir through July 8, 2019.

Sample Date	Sample Size	Black Lake	Chignik Lake
6/25	188	99.8%	0.2%
7/1	188	98.4%	1.6%
7/8	187	64.0%	36.0%

Statistical charts, harvest strategies, and subsistence fishing permits are available at the Chignik weir and the Kodiak regional ADF&G offices. Commercial fishing information, regulations, commercial harvest, escapement, and news releases can be found on the ADF&G website at http://www.adfg.alaska.gov/index.cfm?adfg=commercialbyareachignik.salmon and by calling the 24-hour record-a-phone at (907)486-1839. Fishermen are encouraged to standby on VHF Channel 6 at 9:15 a.m. and 5:15 p.m. daily for fishery updates.

This project is funded by a Saltonstall-Kennedy Fund (award number NA17NMF4270236). Samples were collected at the Chignik weir and analyzed at the Gene Conservation Laboratory by Commercial Fisheries Division staff.
These results are in−season estimates and are therefore preliminary in nature.
