1984 Revision

84-21a

State of Alaska
Department of Fish and Game
Public Review Nomination for Waters
Important to Anadromous Species

___ Addition ✓ Deletion

Name of Waterbody (if known): 283-52-10900

Location:

Anadromous Waters Catalog Volume and Number SW III

USGS 1:63,360 Quadrangle Port Moller A-6 #32

or 1:250,000 (if 1:63,360 not available) Port Moller

Species	Date(s) Observed	Stage(s) (Spawning, Rearing, Migration)
coho	see	
pink	below	spawning } all stages
chum	/	spawning } all stages

Comments: Please provide any clarifying information. Also, please include a map of the area identifying the stream reach. This can be a copy of the map from the Anadromous Waters Atlas.

delete entire stream from catalog

The map is inaccurate, there is no creek at this place. Its probable that this is an old channel to the Volcano R. Observed 1972-83. Note: I checked the map & the described channel is not in the Atlas, only the Volcano R. don't alter the map.

Per telephone conversation w/ A. Shaul 1-25-84

Name of Observer (please print) Arnie Shaul

Date: 12/14/83 Signature: Arnold R. Shaul
