Species	Date(s) Observed	Spawning	Rearing	Migration
PINK SALMON	31 August 1984	X		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

See attached field notes. I saw ≈ 50 live fish, mostly in first 300 m. of stream, and about 25 morts.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

31 Aug.

4 + 16 loons (rt?)
2 pfalcons flying, calling + perched on steep clay wall.

vg in the sunshine 3 past cliffs

at big creek – ~50 humpies running, ~25 morts. ; ♀ + ♂ mallard
where smaller creek comes in, Neil French has built cabin – he's from Kodiak, has built place from driftwood, used a froe to make his own shakes – long + short ones. He's in bed w/a back-ache; we talk briefly – he + murphy were @ haulout in July + saw ~2000 seals – they estimate.

I picked up whale vertebra, but beach here pretty picked clean.
Back via Big Creek + valley –
2 bald eagles
28 ptarmigan
4 saw-sparrows

Roxanne checks haulout when she comes back + sees seals – from rift to ascent gully – maybe ~ more than this a.m. →
