RE: Closure of fishing on waters within 100 feet of nets in Main Bay

We cannot use strong enough words to express our concern about the possible closing of fishing water in Main Bay. This is a red salmon fishery that my family uses every year. In fact, this is usually the only fishery that we can get red salmon.... It also seems odd that the commercial fishermen can string nets all over PWS and harvest well over 99% of the fish, and the sports crowd gets shoved aside at every opportunity.

This closure would effectively eliminate the PWS red salmon fishery for most sportsmen, including us.
